ASSIGNMENT-1

Long Term Virtual Internship – Data Analytics using Tableau

Pre-Requisites:

Open Tableau and Connect Excel "super market.csv"

1.Prepare Bar Chart

Purpose:

- Compare sales performance across different product lines
- Identify the best-selling and lowest-selling products\ STEPS:

Step – 01: Create a New Sheet and name it as "Bar Chart"

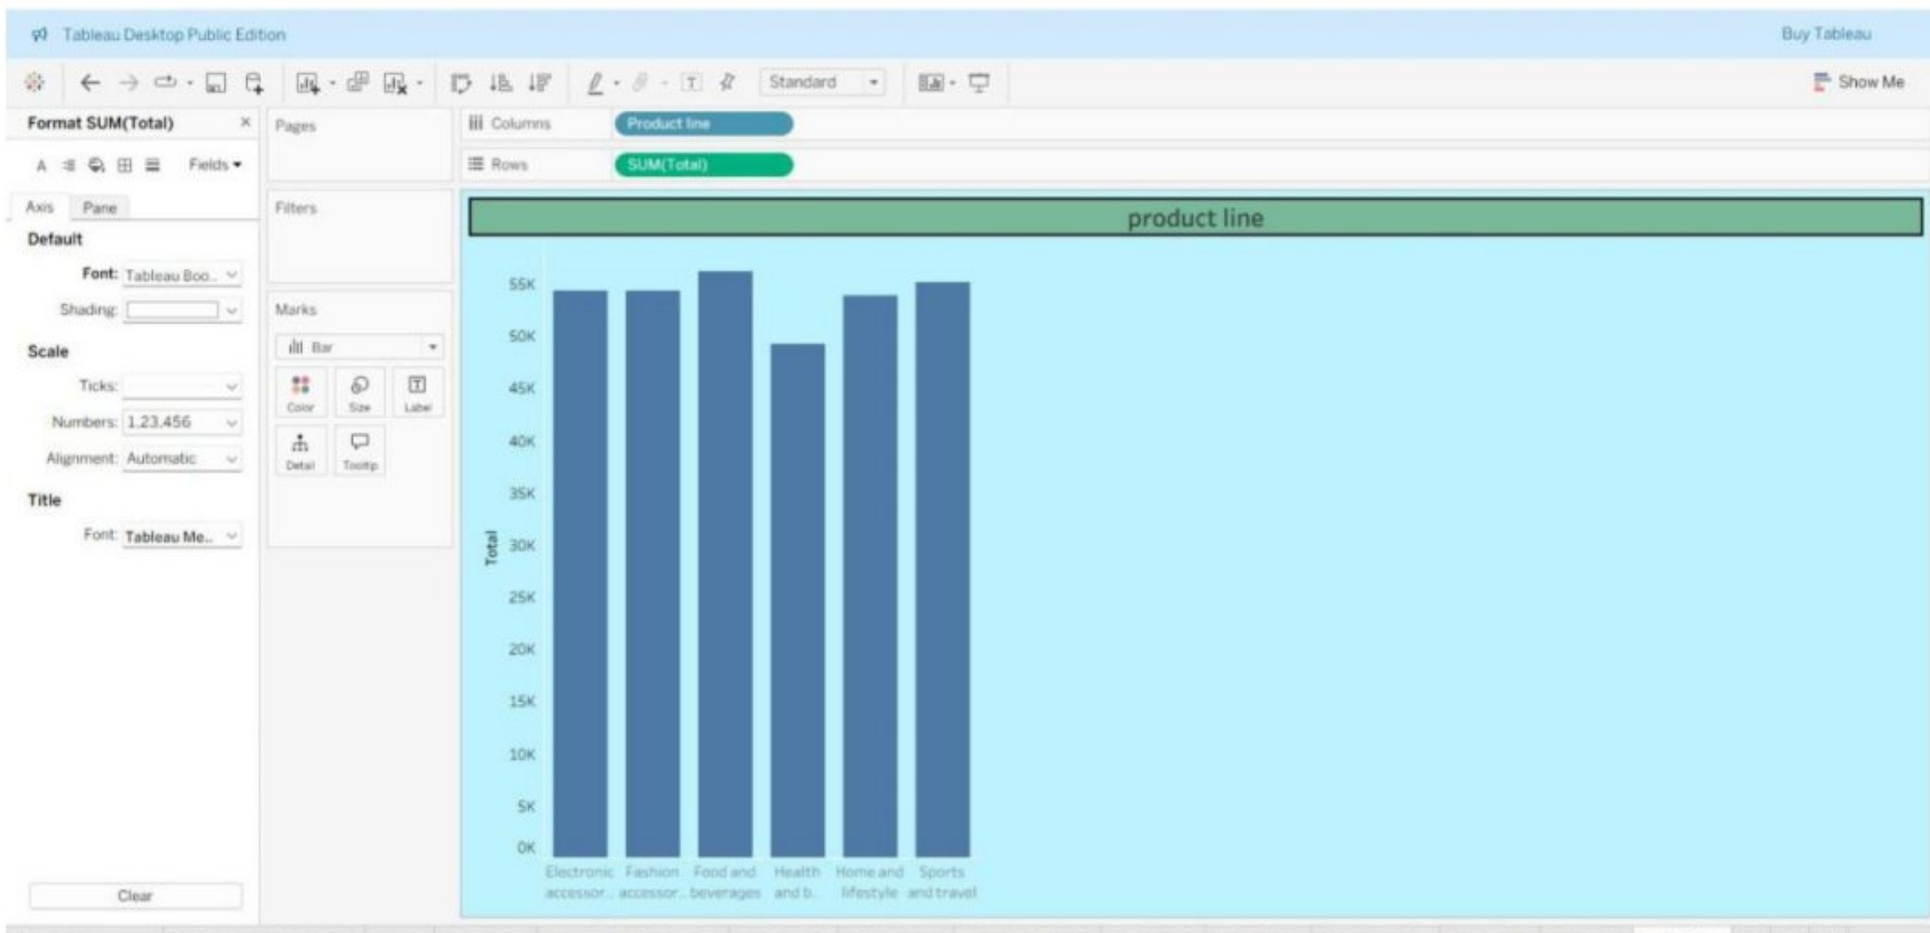
Step – 02: Drag product line to column

Step – 03: Total to Rows

Step – 04: Product line to Marks (to Add color)

Output:

BARCHART: TOTAL SALES BY PRODUCTLINE



Scanned with OKEN Scanner

2.Prepare Pie Chart

Purpose:

- Compare which payment method is used the most.
- Help businesses understand customer payment preferences.

STEPS:

Step - 01: Create a New Sheet and Renamed as “Pie Chart”

Step - 02: Drag payment to Columns

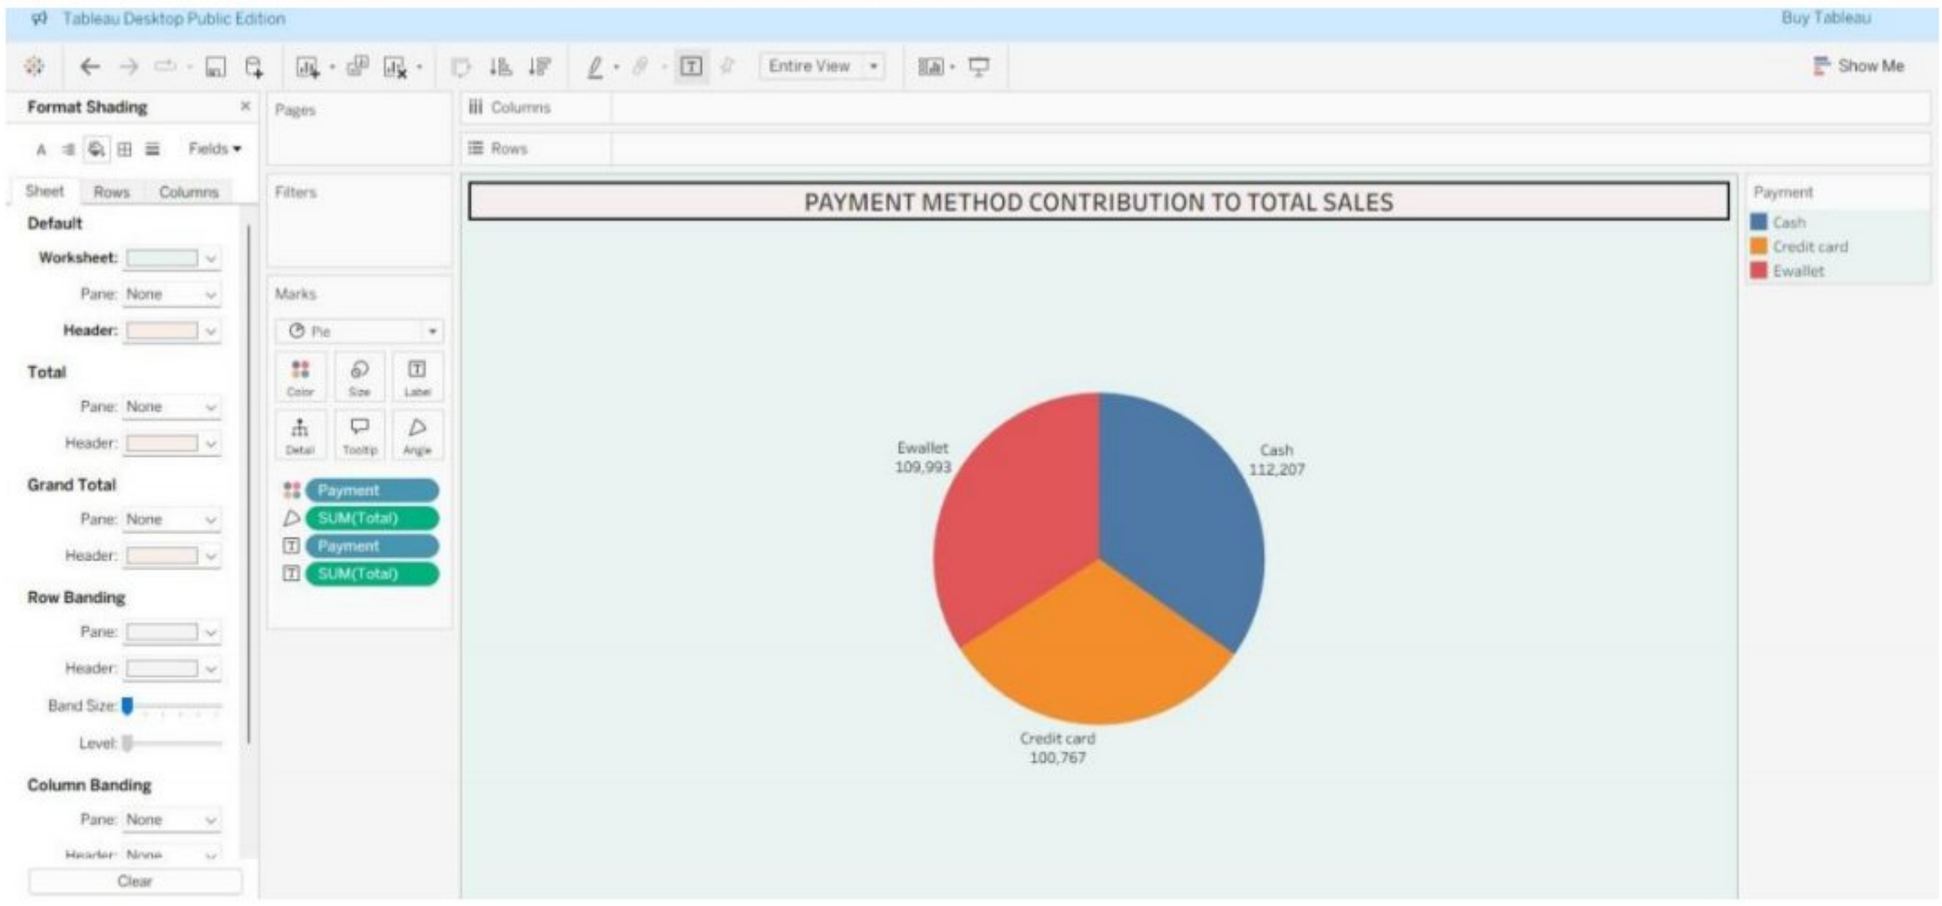
Step – 03: Drag Total to Rows

Step - 04: Add payment to color

Step – 05: Add Label to total->right click on Label->select quick table calculation- >click

<u>Output:</u>

PIE CHART: SALES SHARE BY PAYMENT MODE



Scanned with OKEN Scanner

3.Prepare Stacked Bar Chart

Purpose

- Compare total sales performance across branches (A, B, C).
- Show which branch generates the highest revenue.

STEPS:

Step-1: Create a New Sheet and Renamed as “Stacked Bar Chart”

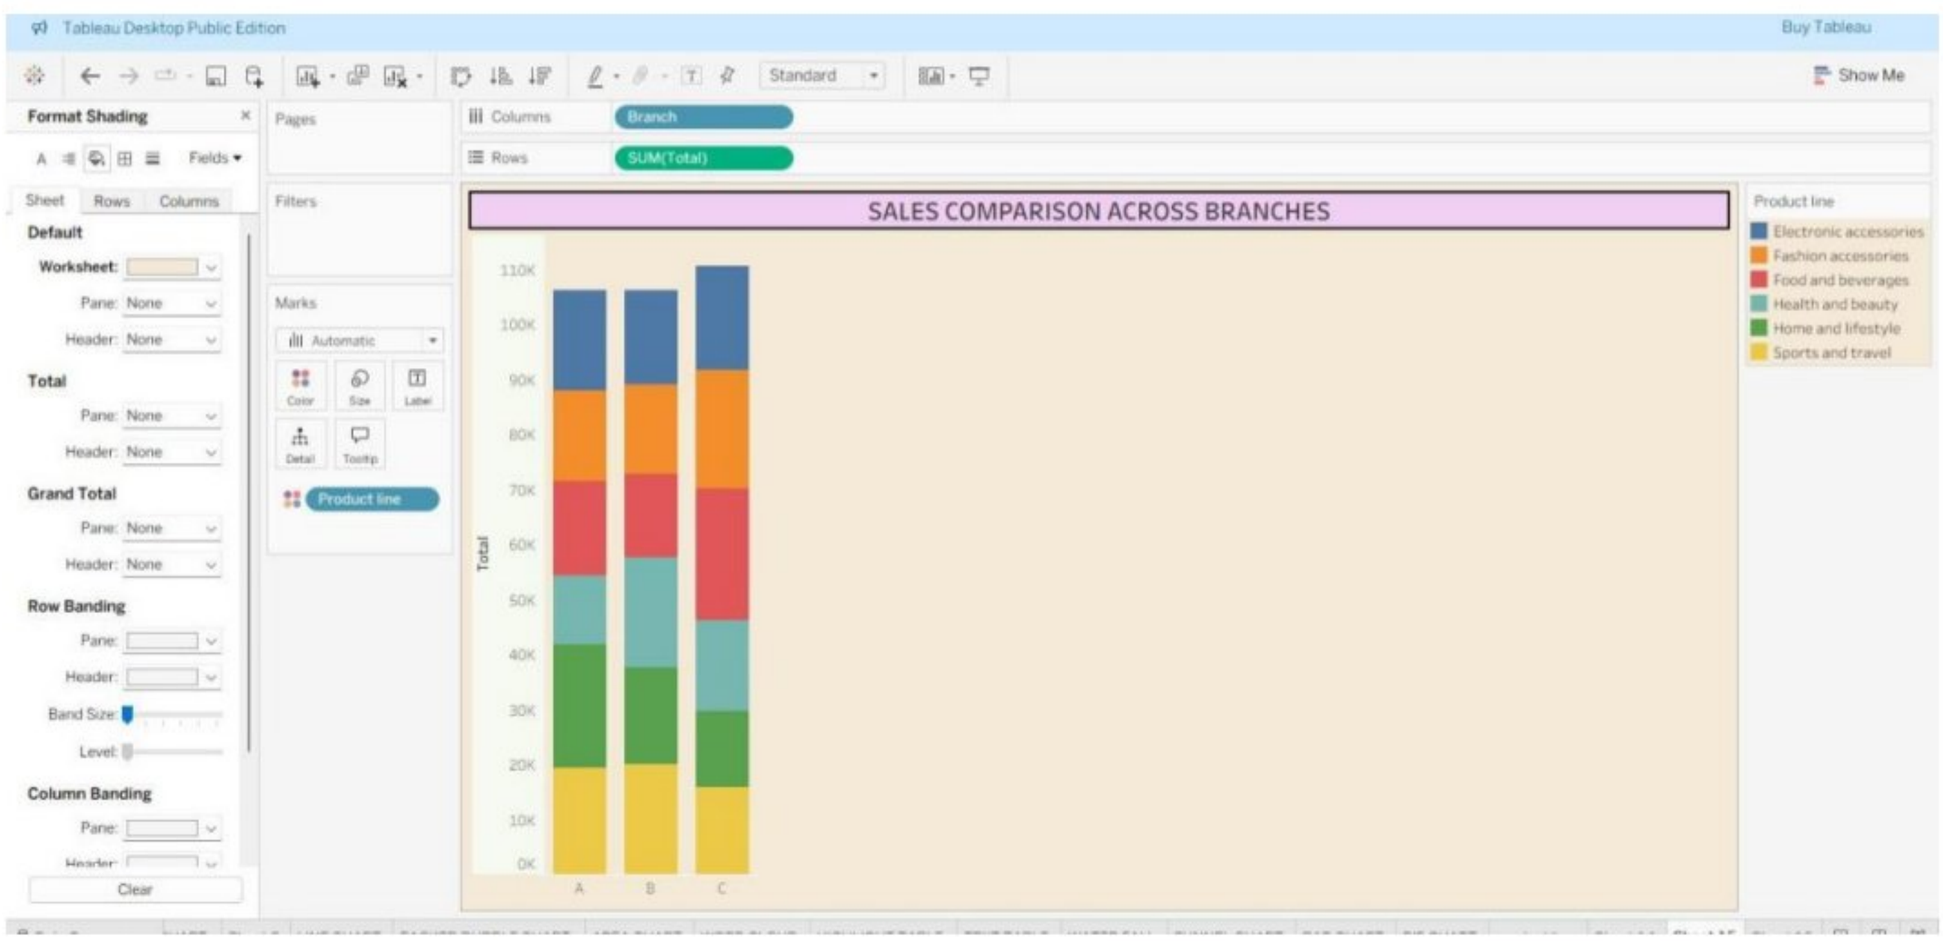
Step-2: Drag Branch to columns

Step-3: Total to Rows

Step-4: Drag payment to marks and add color

<u>Output:</u>

STACKED BAR CHART: TOTAL SALES BY BRANCH



Scanned with OKEN Scanner

4.Prepare Line Chart

Purpose:

- Show how total revenue changes over time (month by month).
- Identify increases or decreases in sales.

STEPS:

Step-1: Create a New Sheet and Renamed as “Line Chart”

Step-2: Drag Date to Columns

Step-3: Drag Total to Row

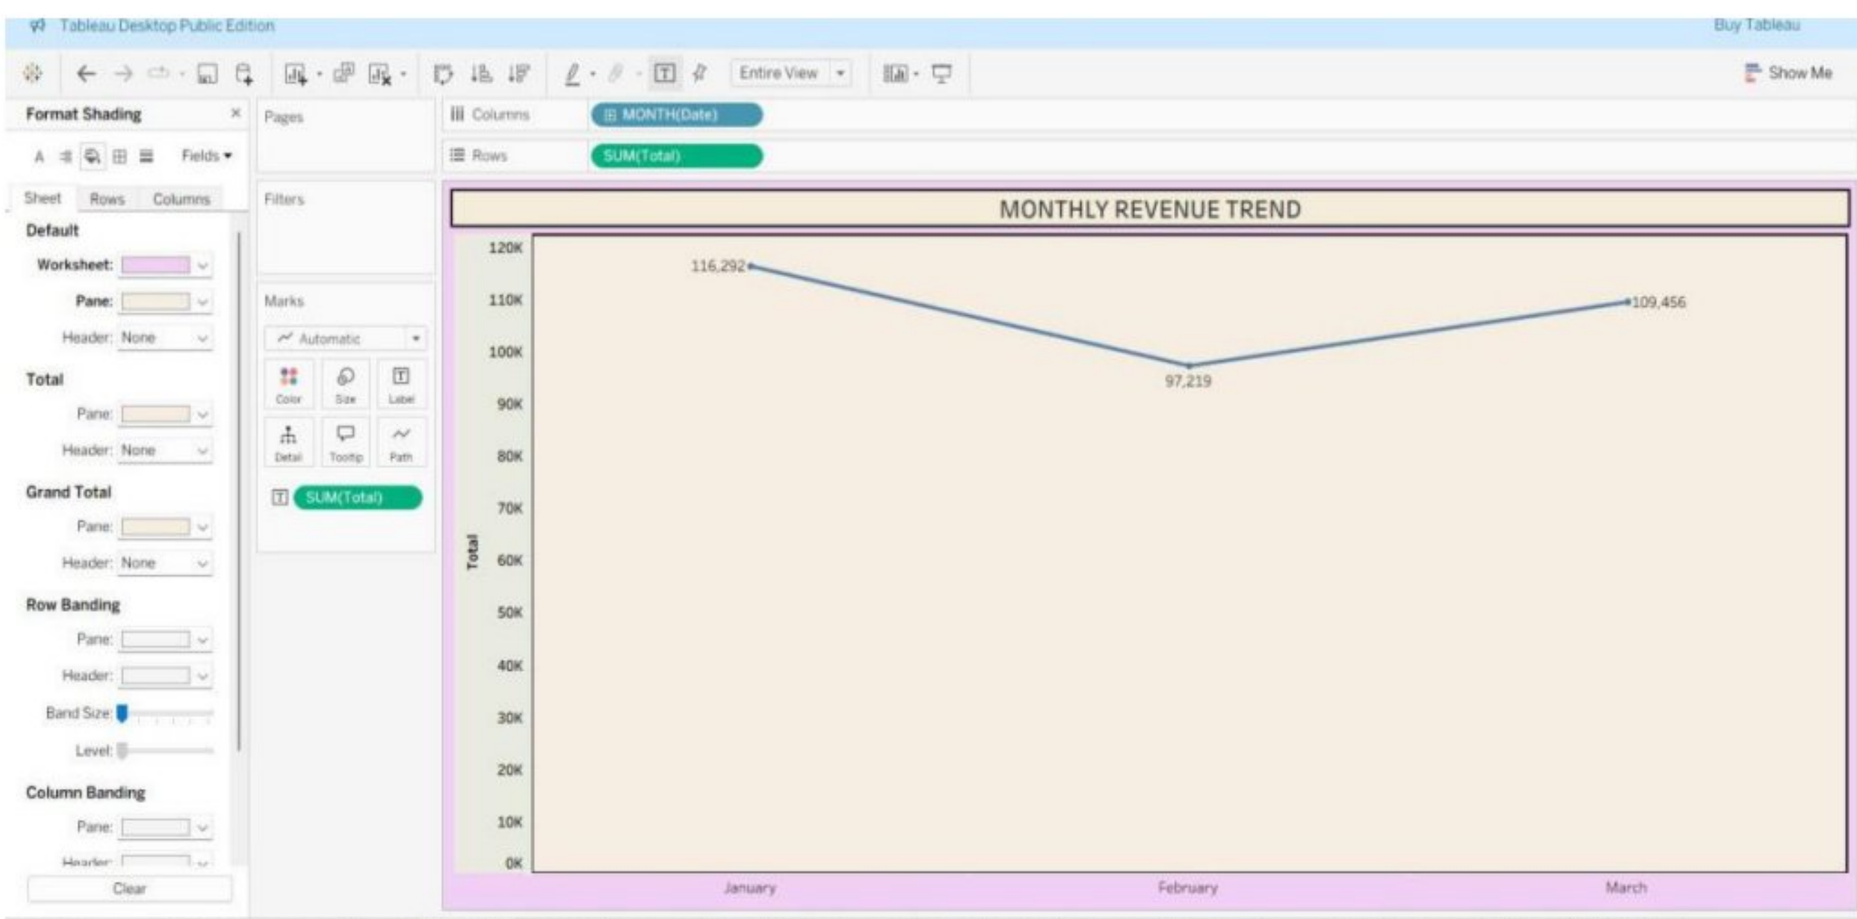
Step-4: click the Drop-down arrow on Date (in columns)

Step-5: select Month->then select line on Marks

Step-6: Drag Branch on color (Marks card) Add color as your choice

<u>Output:</u>

LINE CHART: MONTHLYH REVENUE TREND



Scanned with OKEN Scanner

5.Prepare Bubble Chart

Purpose:

- Show the sales contribution of each product line to total revenue.
- Compare product lines visually using bubble size.

STEPS:

Step-1: Create a New Sheet and Renamed as “Bubble Chart”

Step-2: Drag product line Detail (marks card)

Step-3: Drag Total(size)

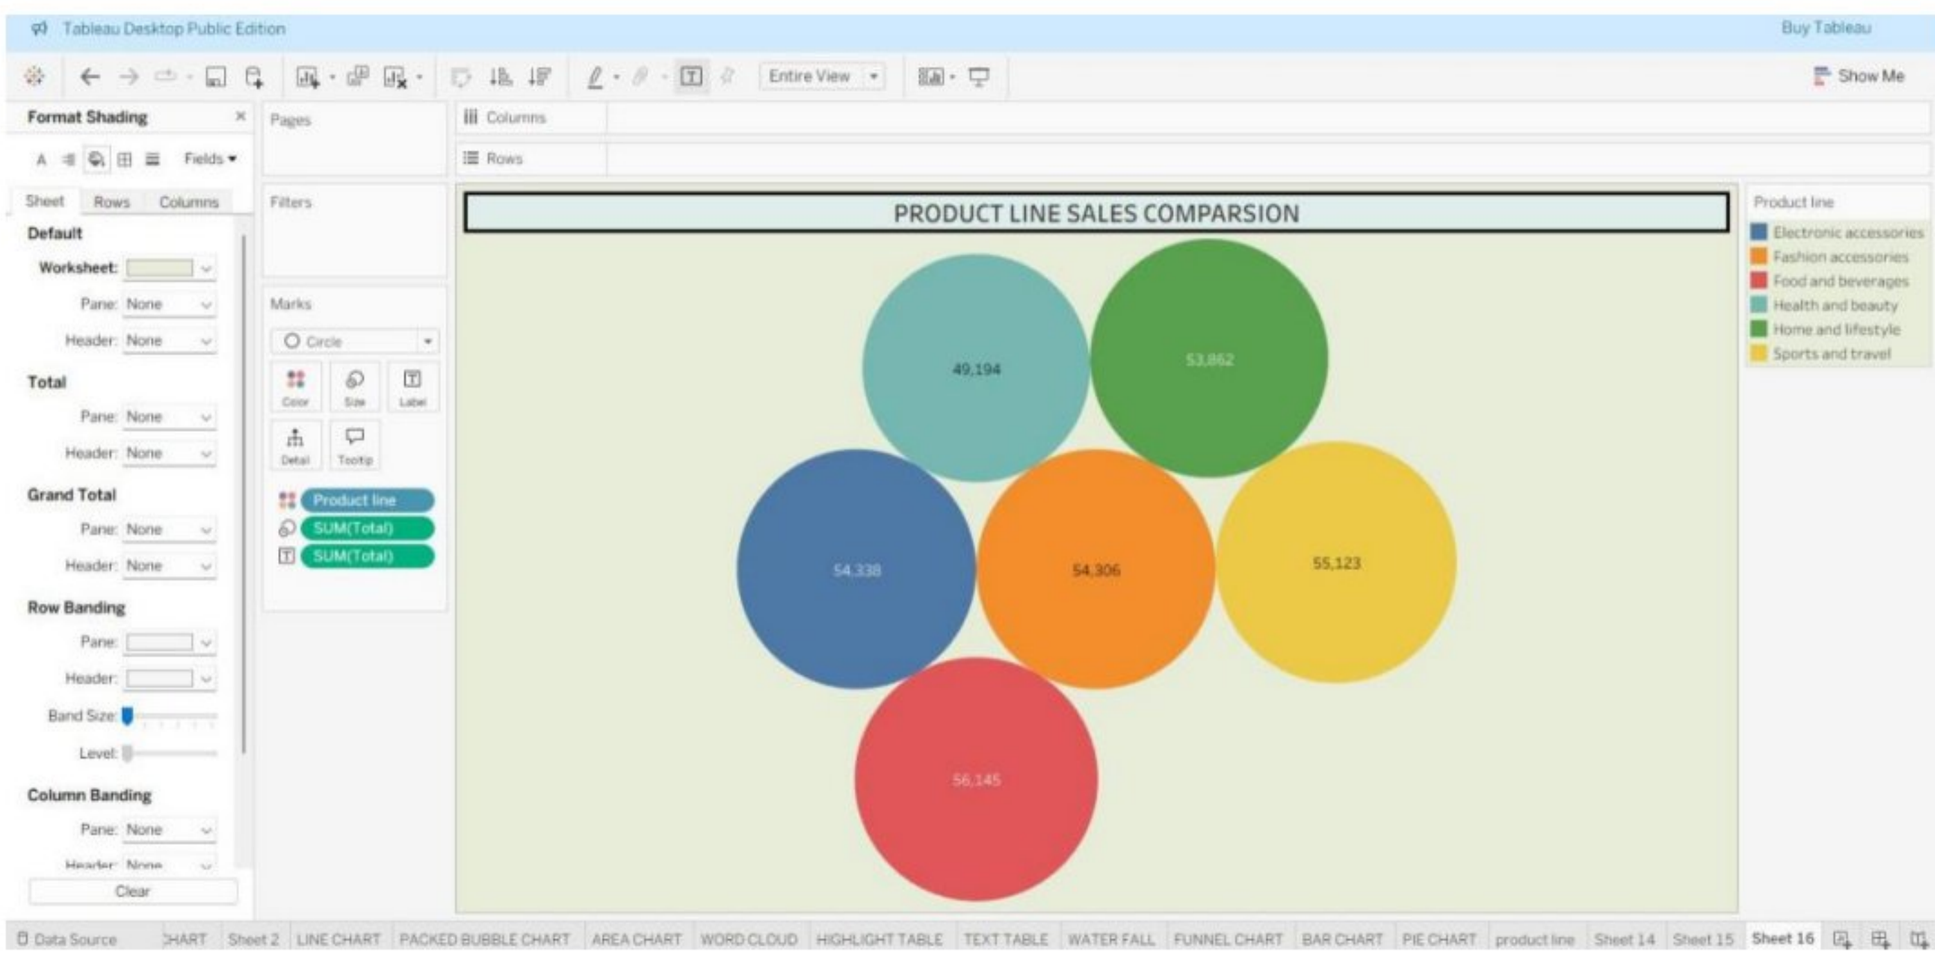
Step-4: Drag product line(color)

Step-5: Drag total(label)

Step-6: On top bottom change Standard →Entire views

<u>Output:</u>

BUBBLE CHART: PRODUCT LINE SALESD CONTRIBUTION TO TOTAL SALES



Scanned with OKEN Scanner

ASSIGNMENT-2

Long Term Virtual Internship Data Analytics using Tableau

1. Prepare Donut Chart:

PURPOSE:

- Understand total sales performance
- Compare sales across product categories

STEPS:

Step 1: Connect Data

1. Open Tableau
2. Click Connect → Select your dataset (Excel/CSV, etc.)

Step 2: Create Basic Pie Chart

1. Drag Category → Rows
2. Drag Sales → Marks → Angle
3. Change Marks type to Pie
4. Drag Sales → Label (to show values)
5. Drag Category → Color

Step 3: Convert Pie to Donut Chart

1. Create a calculated field:
   ZERO = 0
2. Drag ZERO to Rows twice
3. Right-click second ZERO → Dual Axis
4. On the second Marks card (inner circle):
   - Change to Pie
   - Remove Category
   - Make it White color
   - Reduce size (this creates the hole effect)

Step 4: Show Total Sales in Center

1. Drag Total Sales (SUM(Sales)) to Label of inner pie
2. Format text → Align center
3. Edit label to show:
   Total Sales
   322,967

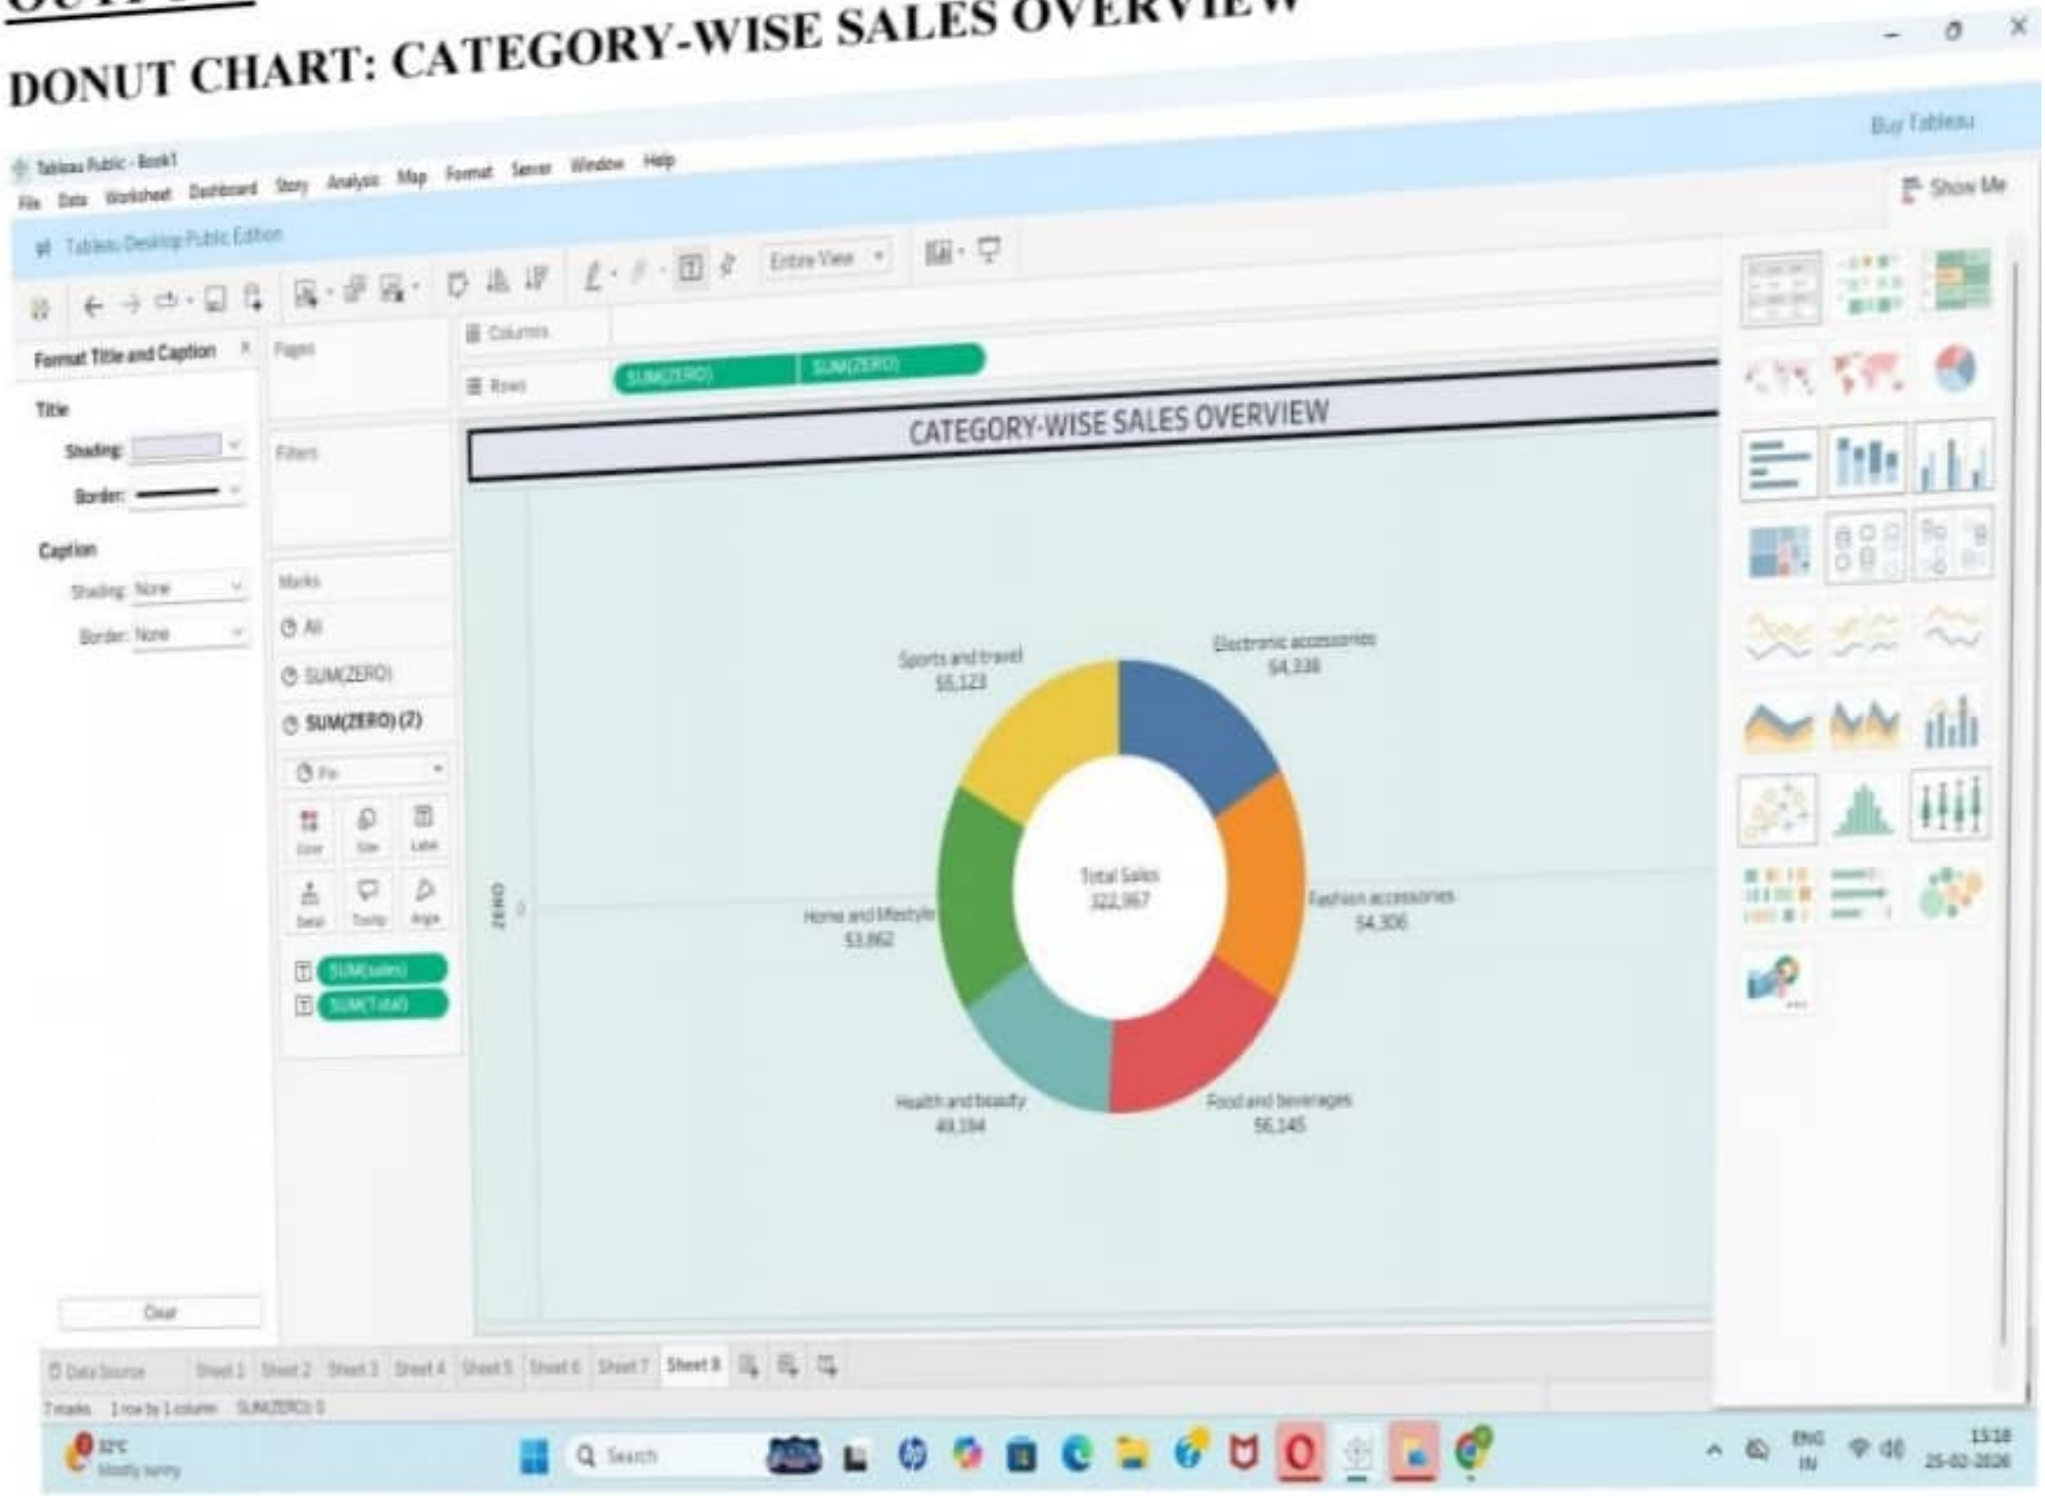
Step 5: Add Title & Formatting

1. Click Worksheet → Show Title
2. Edit title to:
   CATEGORY-WISE SALES OVERVIEW
3. Format background color and borders (optional)

Scanned with OKEN Scanner

OUTPUT:

DONUT CHART: CATEGORY-WISE SALES OVERVIEW



Scanned with OKEN Scanner

2.Prepare Area Chart:

PURPOSE:

- Monitor monthly sales changes **(January, February, March)**
- Understand each branch's contribution **to total sales**

STEPS:

Step– 01: Create a New Sheet and Renamed as "Area Chart"

Step–02: Drag Date →Columns Shelf-Click the drop-down on Date Select Month

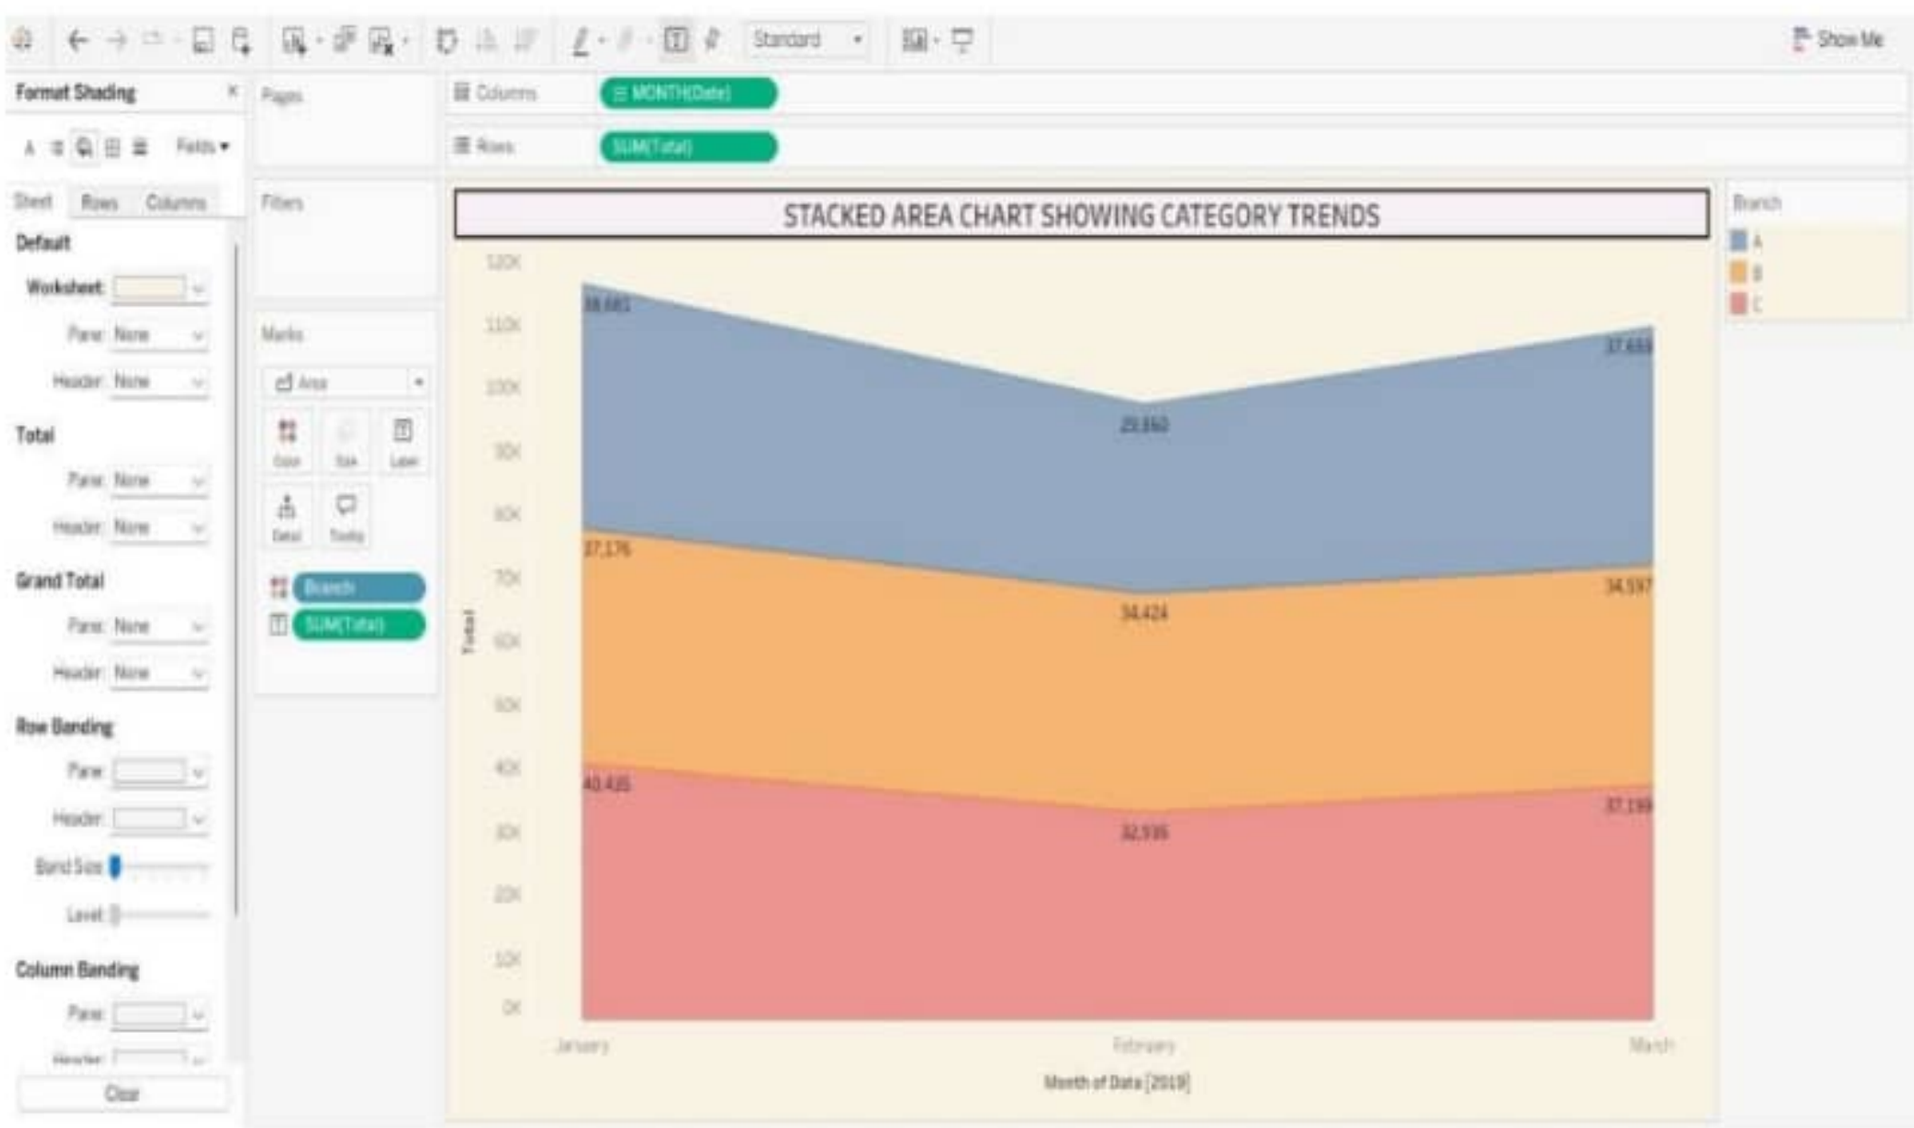
Step-03: Drag Total → Rows shelf

Step-04: Click Show Me (top right) Select Area Chart

Step-05: Drag city → Colour (in Marks card)

OUTPUT:

AREA CHART: STACKED AREA CHART SHOWING CATEGORY TRENS



Scanned with OKEN Scanner

3. **Prepare Text Table:**
   PURPOSE:
   - Analyse sales performance by product line
   - Compare total sales across different product categories

   STEPS:

Step 1: Connect to Dataset

- Open Tableau
- Click Connect → Select your dataset (Excel/CSV)

Step 2: Create the View

1. Drag Product Line → Rows
2. Drag Total (Sales) → Marks → Text
3. Ensure aggregation is SUM(Total)

Step 3: Format the Table

1. Click Format
2. Adjust:
   - Background shading
   - Font size
   - Alignment (Right-align numbers)
3. Add alternating row shading (for better readability)

Step 4: Add Title

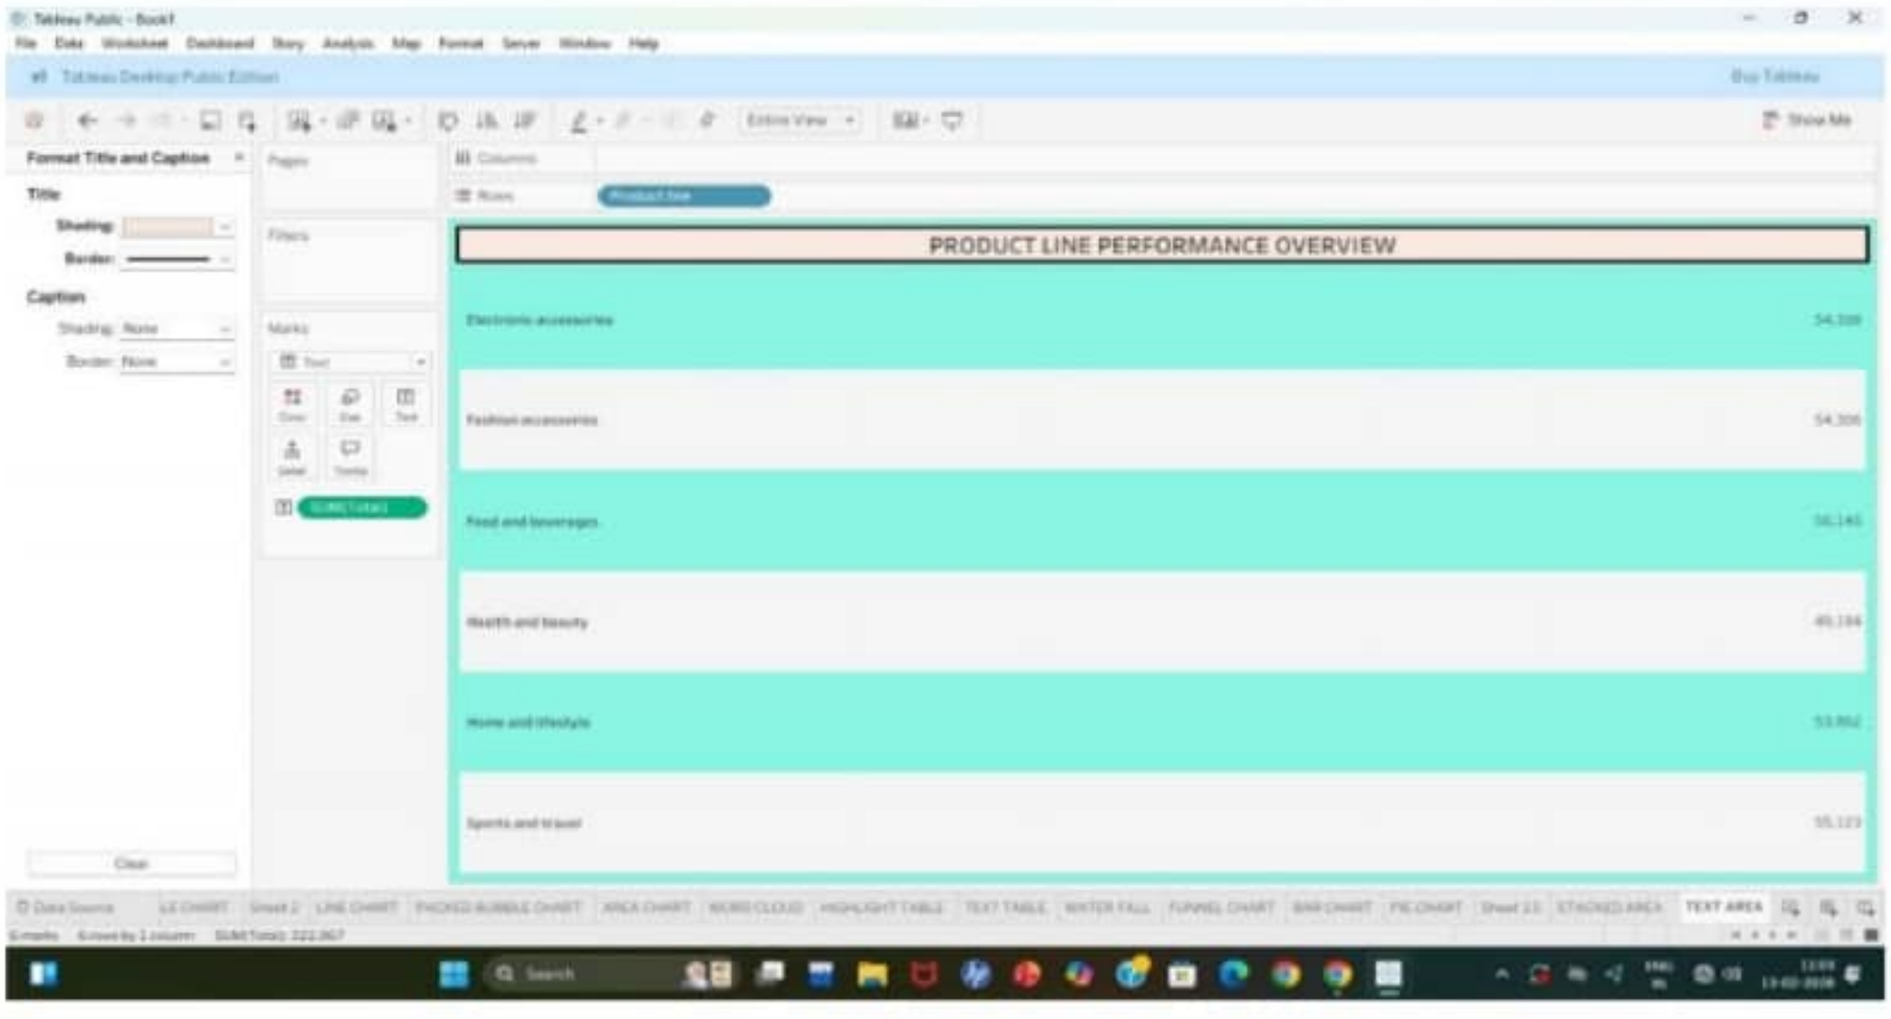
1. Click Worksheet → Show Title
2. Edit title to:
   PRODUCT LINE PERFORMANCE OVERVIEW
3. Format border and shading as needed

Step–05: Set Marks Type to Text-On Marks Card, click the dropdown-Select Text Table

Scanned with OKEN Scanner

OUTPUT:

TEXT TABLE: PRODUCT LINE PERFORMANCE OVERVIEW



Scanned with OKEN Scanner

4.Prepare Highlighted Table:

PURPOSE:

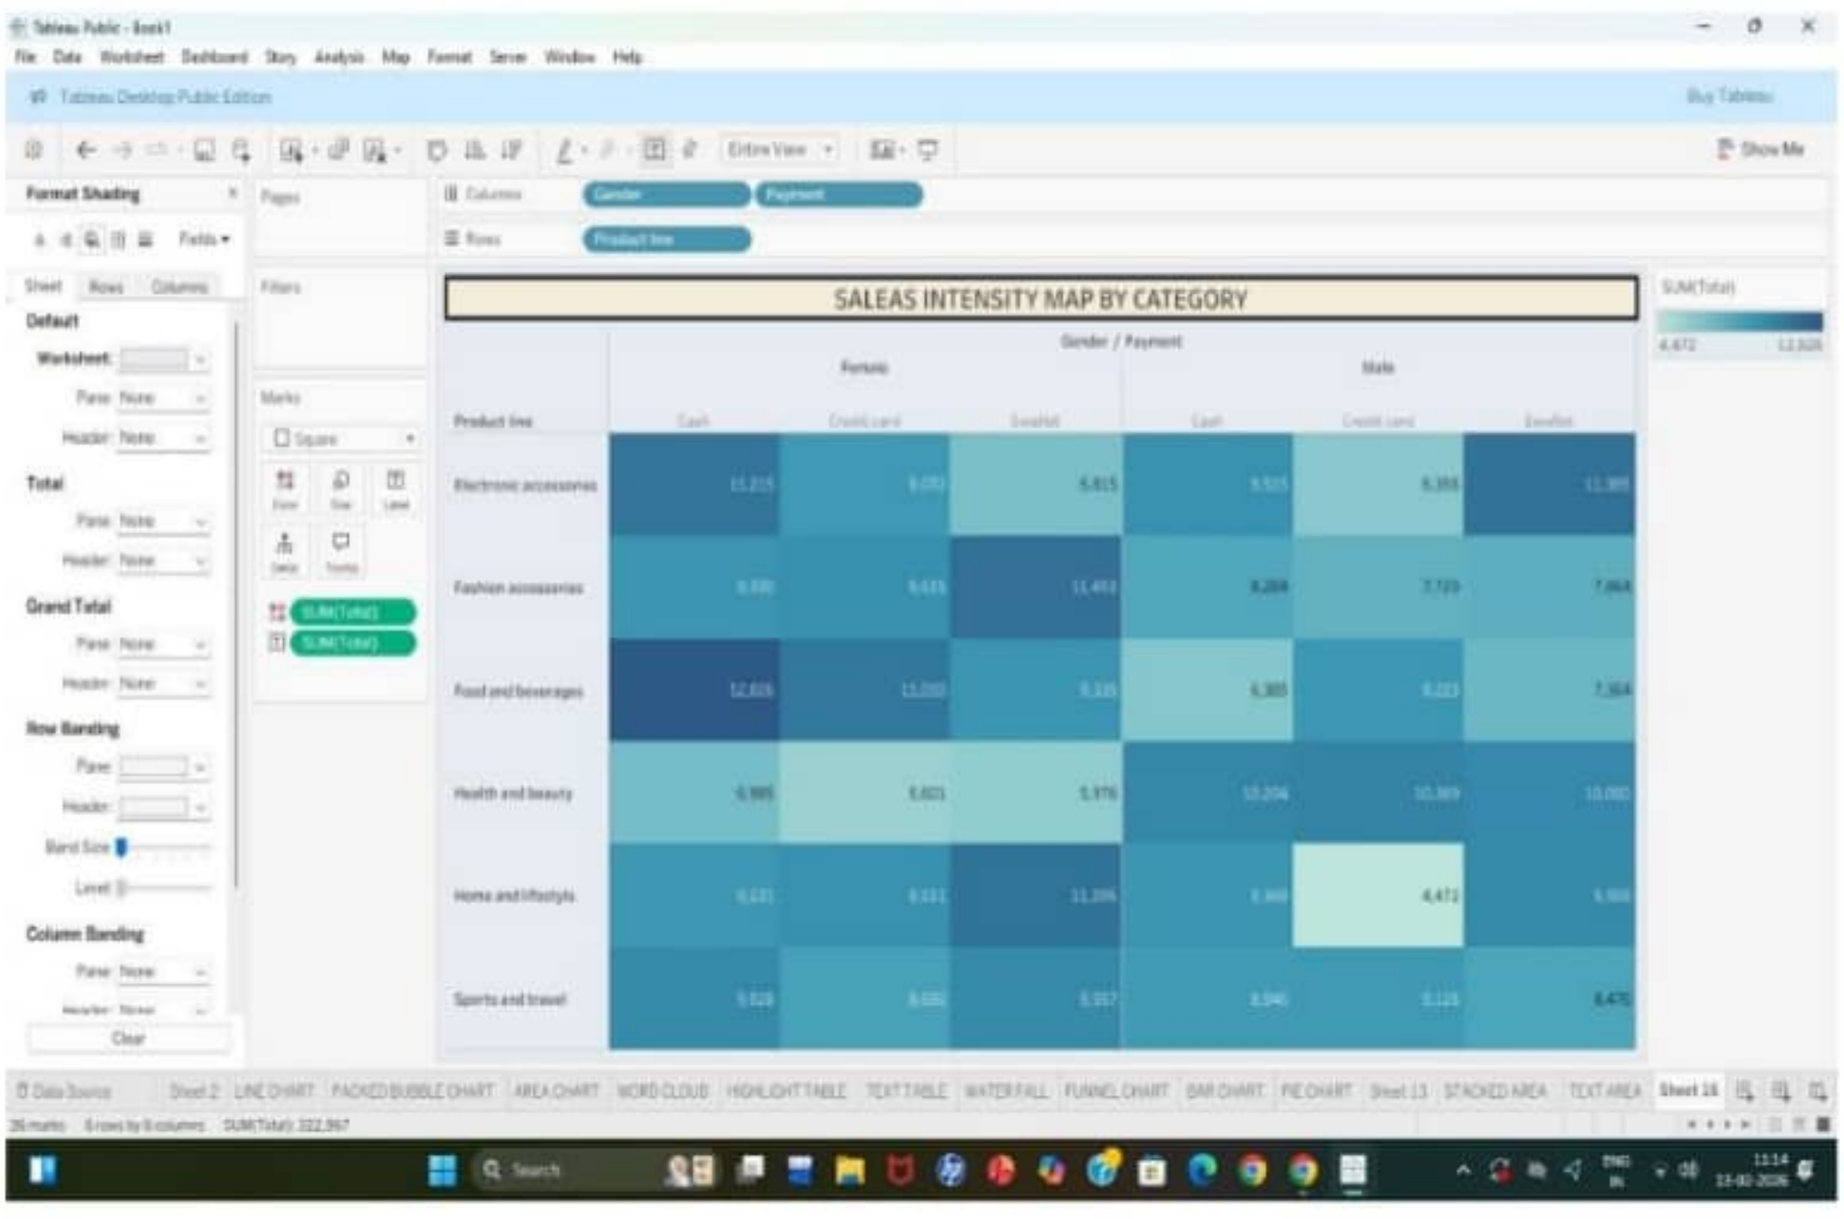
- Visualize sales performance using color intensity
- Quickly identify high and low sales categories

STEPS:

- Step–01: Create a New Sheet and Renamed as "Highlighted Table"
- Step–02: Drag Product line →Rows
- Step – 03: Drag Branch → Columns
- Step – 04: Drag Total → Marks → Colour on the Marks card, Click the drop-down → Select Square
- Step–05: In Marks card Size Drag slider to the right until squares fill the cells.
- Step – 06: Drag Total → Label -Click Label → Show Mark Labels
- Step–07: Click Colour Edit Colours Choose a colour palette Click Apply→Ok

OUTPUT:

HIGHLIGHTED TABLE: SALES INTENSITY MAP BY CATEGORY



Scanned with OKEN Scanner

6.Prepare Funnel Chart:

PURPOSE:

- Compare revenue across product lines
- Visualize ranking in descending order

STEPS:

Step–01: Create a New Sheet and Renamed as "Funnel Chart"

Step–02: On Marks Card-Select Bar

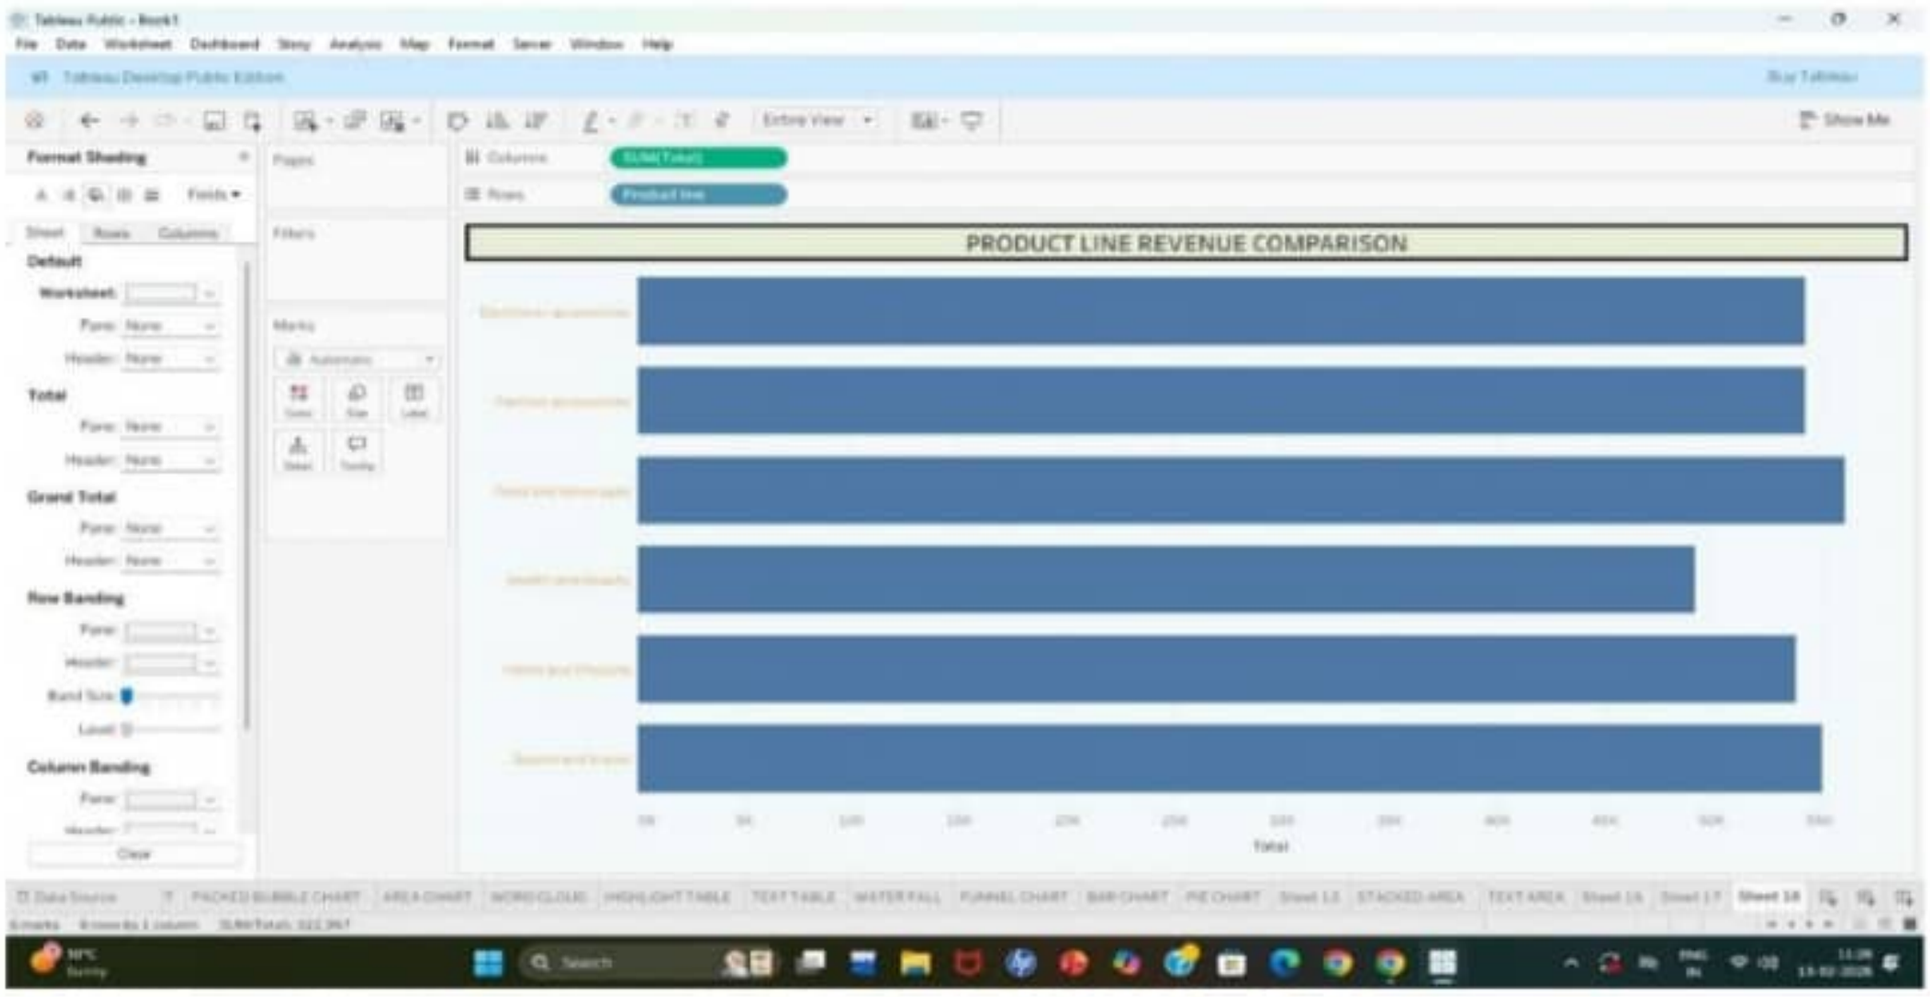
Step – 03: Drag Measure Values → Columns-Edit filters

Step – 04: Drag Measure Names→ Rows-It automatically shows in filter Click Sort Descending (largest to smallest)

Step–05: Right click on sheet-click on Format-Go to Format Shading-click on worksheet -change colour.

OUTPUT:

FUNNEL CHART: PRODUCT LINE REVENUE COMPARISON



Scanned with OKEN Scanner

7.PrepareWaterfall Chart

PURPOSE:

- Show profit generated by each product line
- Display cumulative (running) profit

STEPS:

Step–01: Create a New Sheet and Renamed as "Waterfall Chart"

Step–02: Drag Product line → Columns -Select All

Step – 03: Drag Running Total→ Rows

Step–04: Click Show Me-Select Gantt Bar

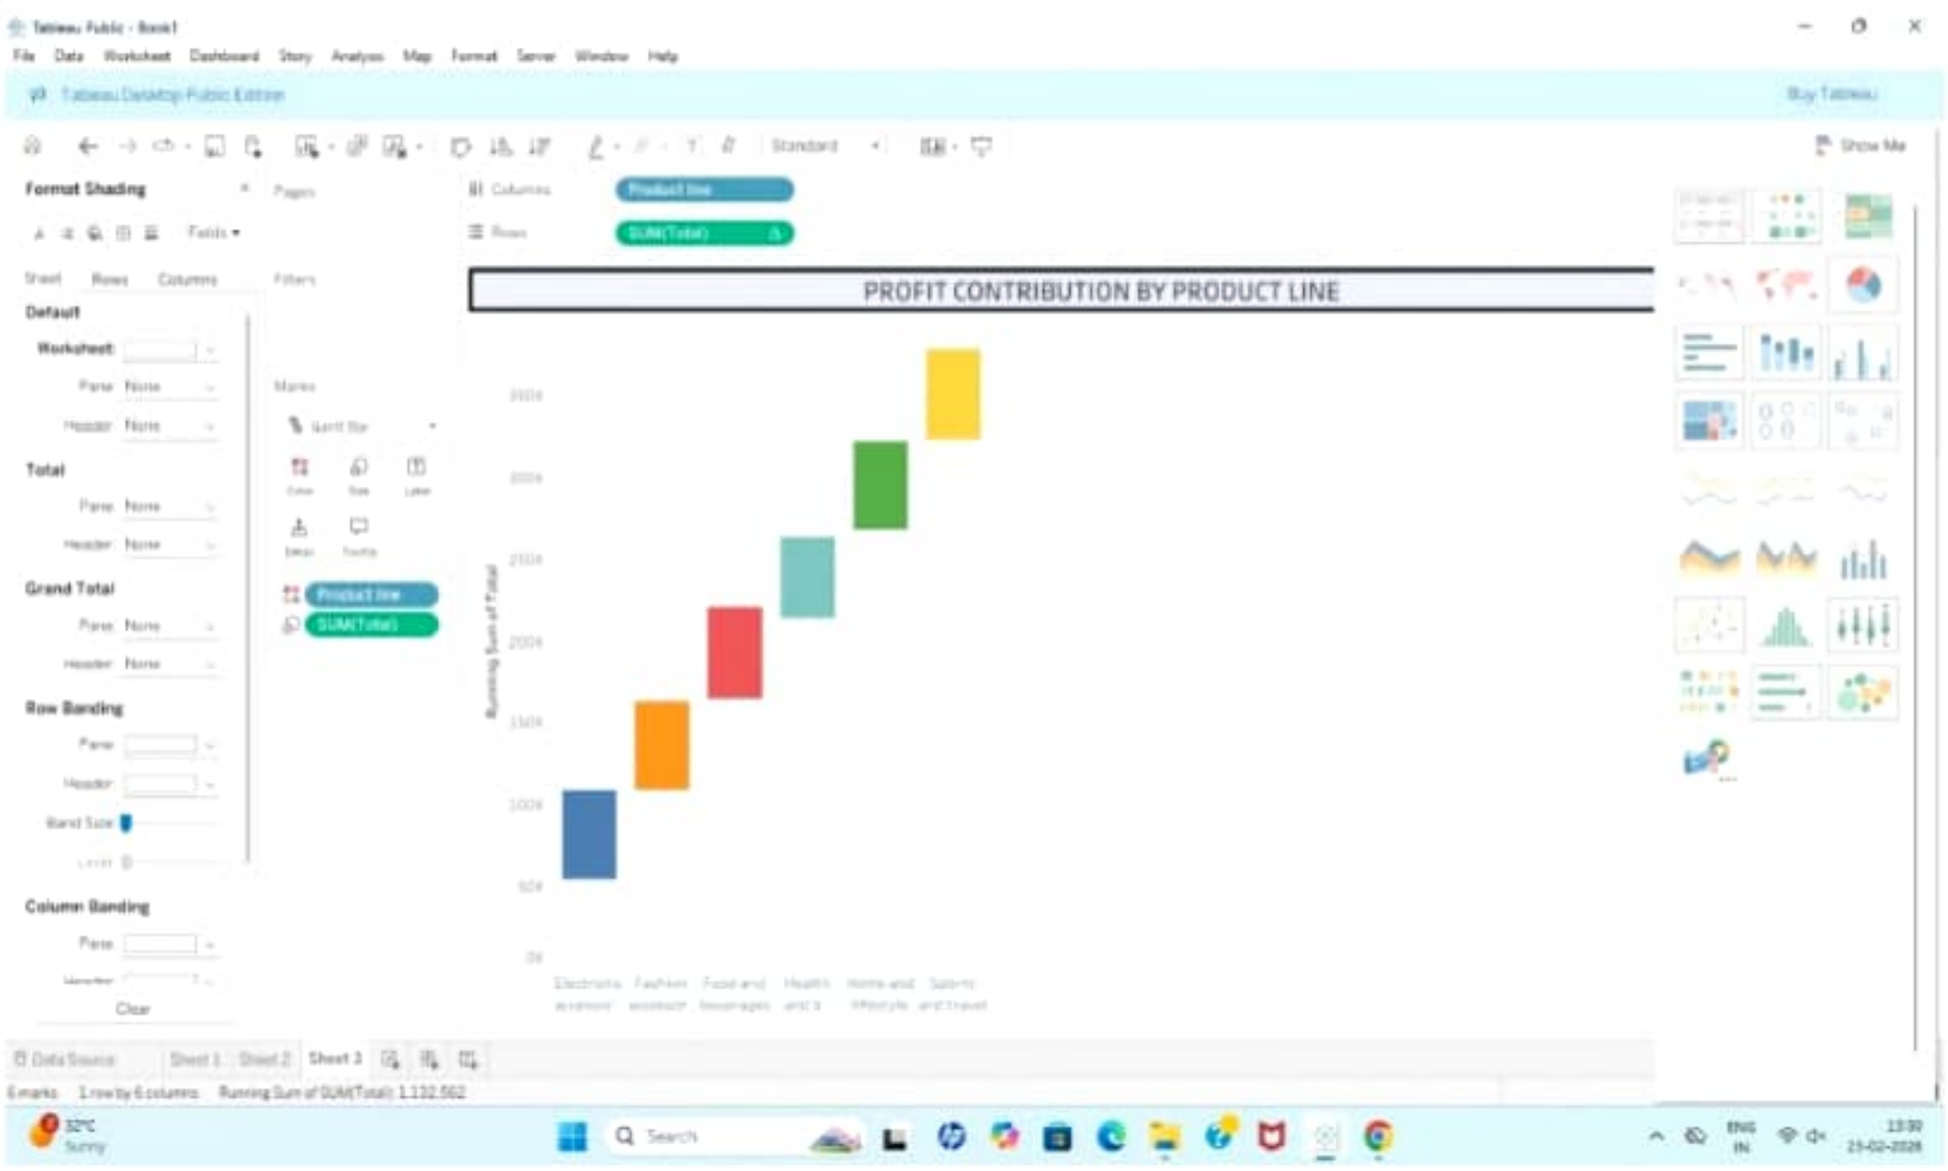
Step–05: Right- click Create Calculated Field Name: Difference Formula: SUM([Total])- Click OK

Step – 06: Drag Difference → Size (Marks card)

Step–07: Drag Difference → Colour Waterfall Chart

OUTPUT:

WATERFALL CHART: PROFIT CONTRIBUTION BY PRODUCT LINE



Scanned with OKEN Scanner
