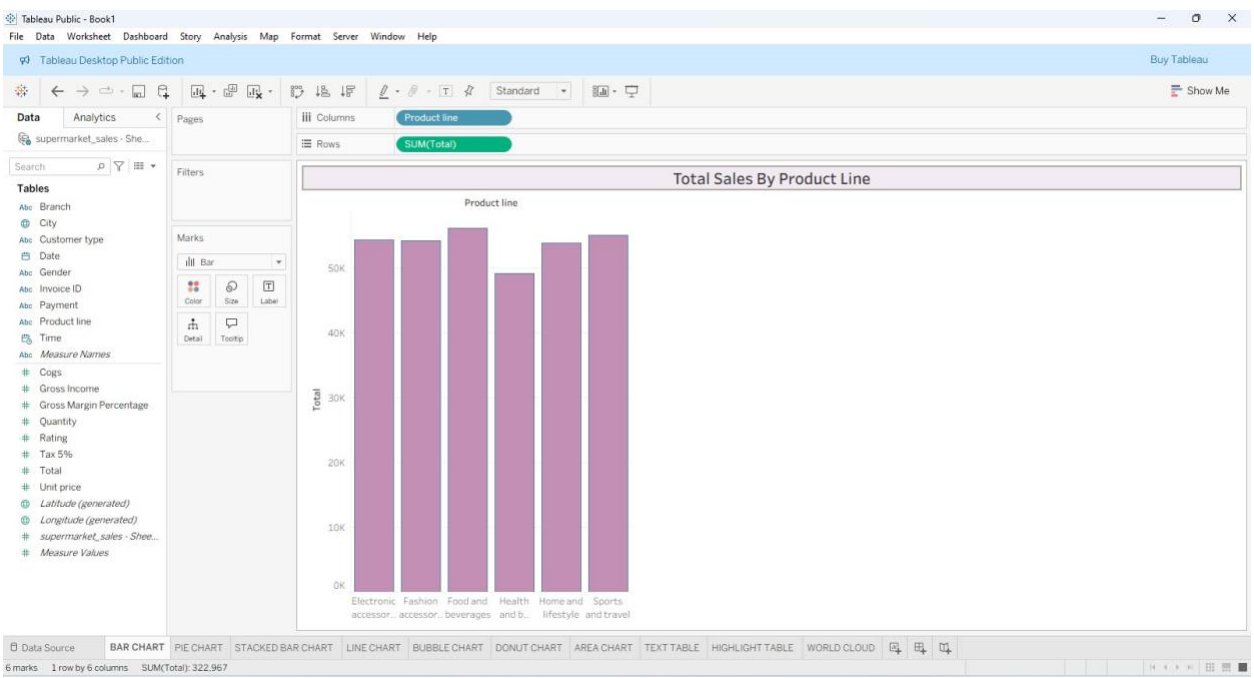
# Assignment – 1

## Bar Chart

**Purpose:** To compare total sales generated by each product line and identify the highest and lowest performing categories.

**Steps:**

- Open a New Worksheet.
- Drag Product line → Columns.
- Drag Total → Rows.
- Ensure aggregation is SUM(Total).
- Select Bar in Marks card.
- Enable Show Mark Labels.
- Sort in descending order.

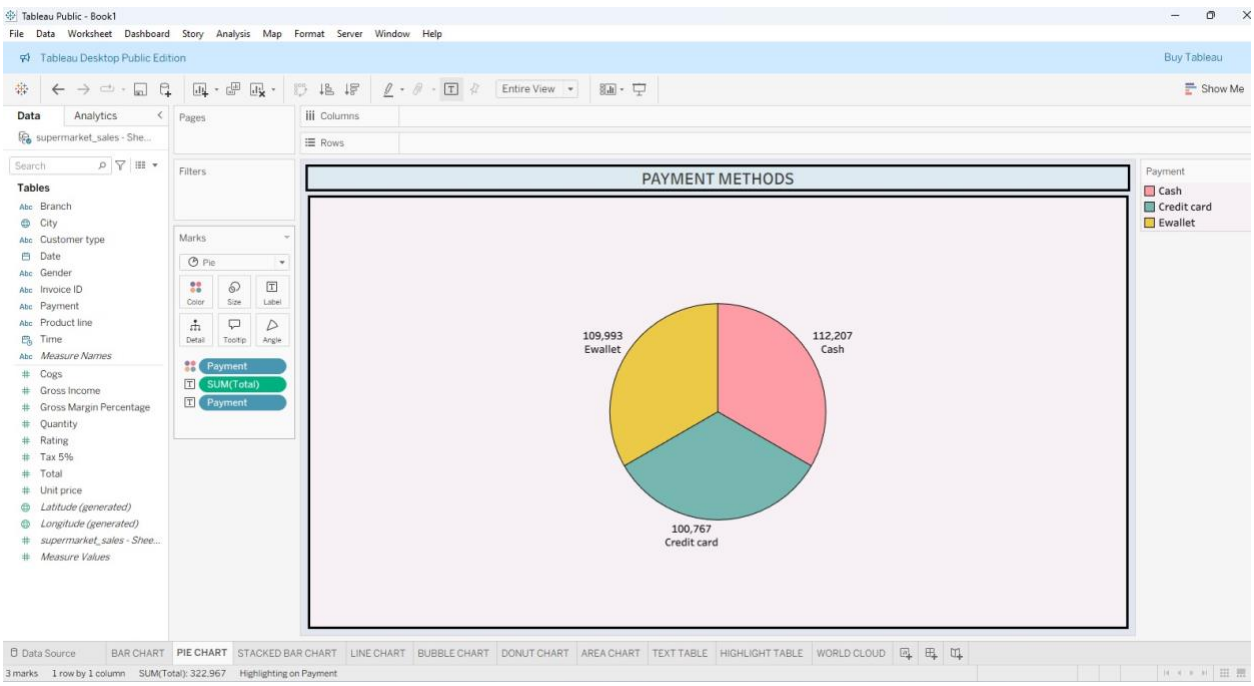


## Pie Chart

**Purpose:** To represent the percentage contribution of each payment method to total sales.

**Steps:**

- Open New Worksheet.
- Change Marks type to Pie.
- Drag Payment → Color.
- Drag Total → Angle.
- Drag Total → Label.
- Apply Quick Table Calculation → Percent of Total.

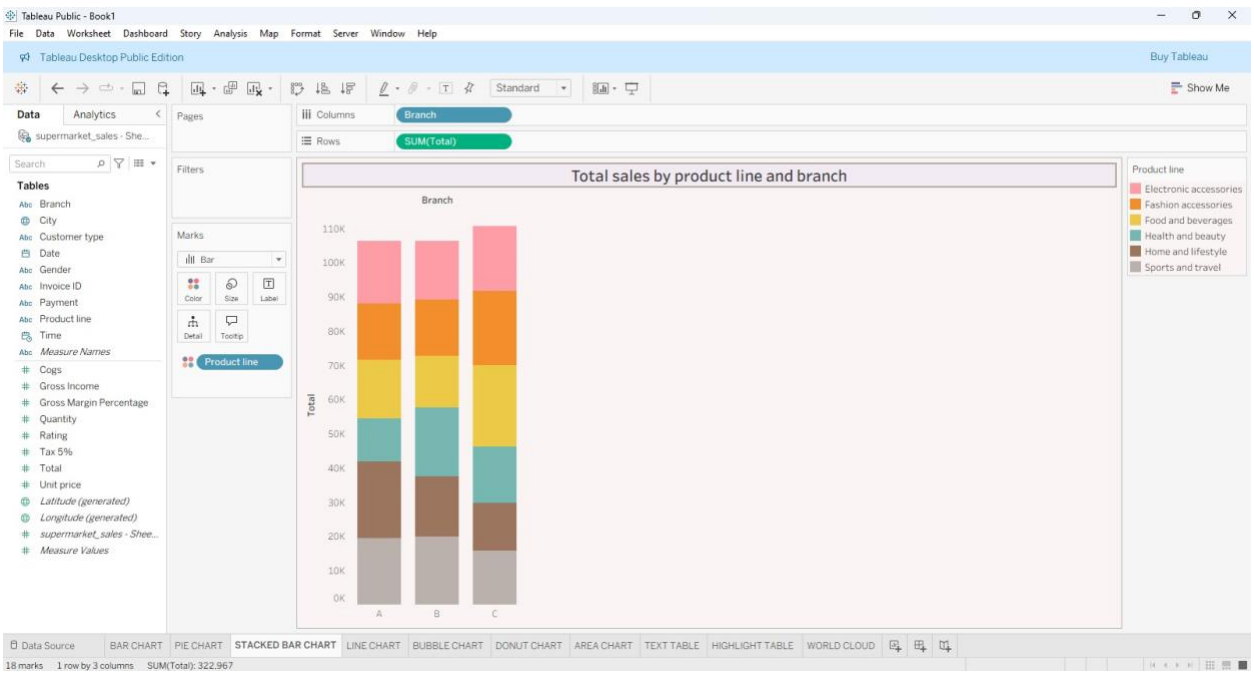


## Stacked Bar Chart

**Purpose:** To compare sales across branches and see the contribution of each product line within each branch.

**Steps:**

- New Worksheet.
- Drag Branch → Columns.
- Drag Total → Rows.
- Drag Product line → Color.
- Bars will stack automatically.

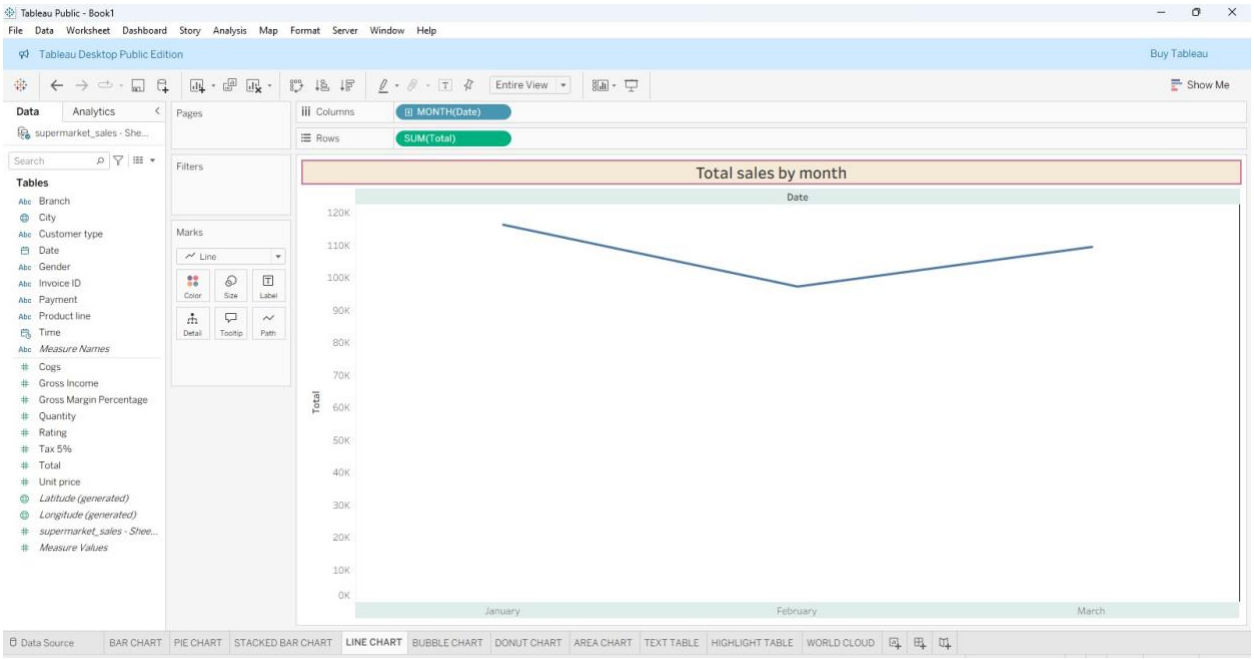


## Line Chart

**Purpose:** To analyze sales performance over time and identify trends.

**Steps:**

- New Worksheet.
- Drag Date → Columns.
- Change to Month format.
- Drag Total → Rows.
- Change Marks type to Line.

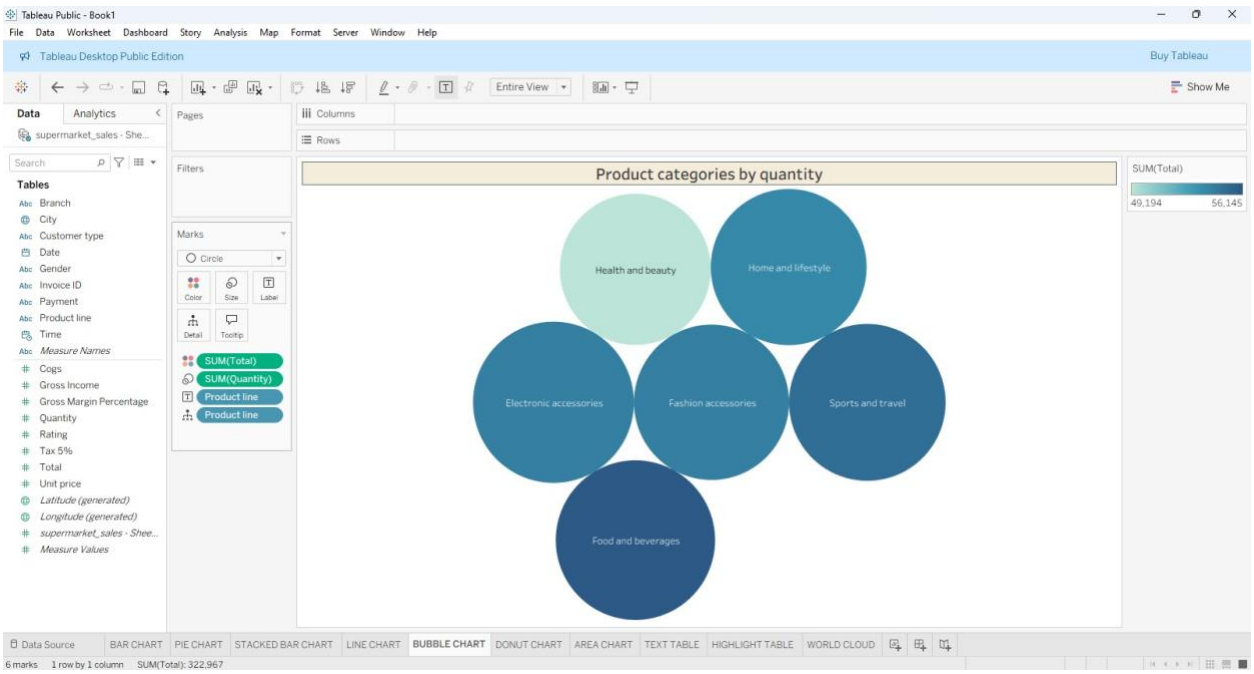


## Bubble Chart

**Purpose:** To visualize sales volume comparison using bubble size.

**Steps:**

- New Worksheet.
- Drag Product line → Detail.
- Drag Total → Size.
- Drag Total → Color.
- Select Packed Bubbles in Show Me.



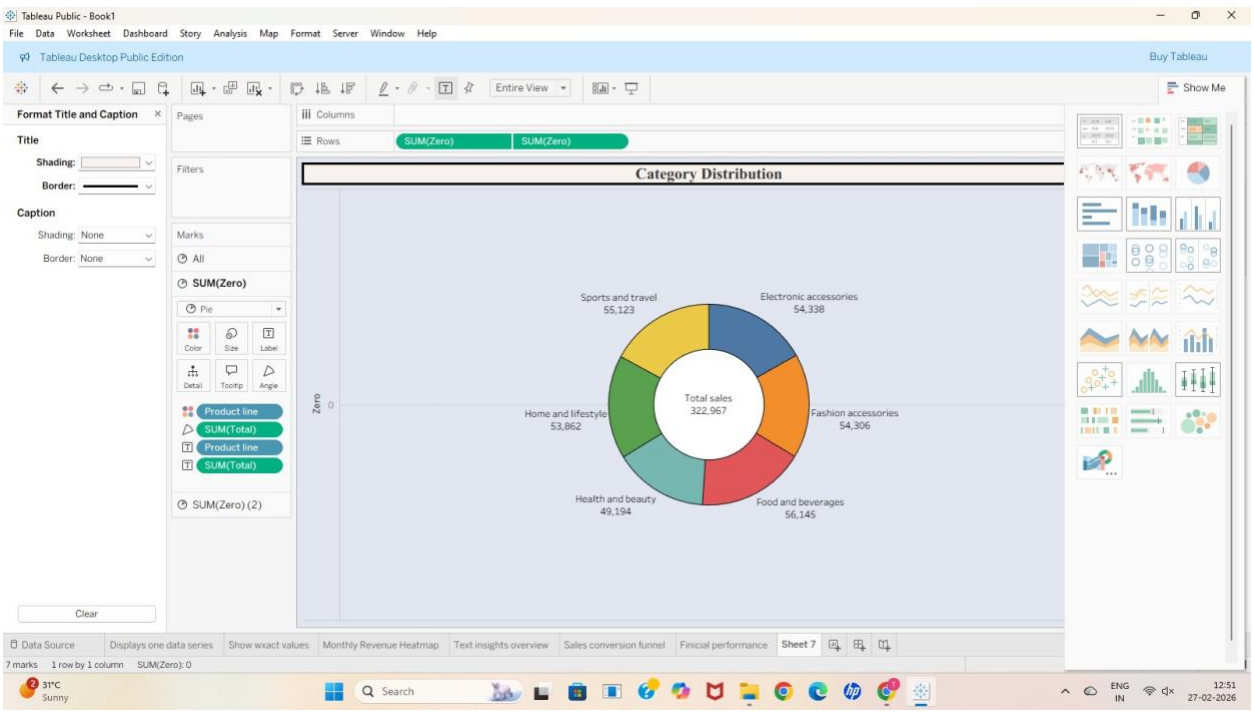
# Assignment -2

## Donut Chart

**Purpose:** To show percentage distribution with total sales displayed in center.

**Steps:**

- Create Pie Chart using Product line and Total.
- Create calculated field: Zero = 0.
- Drag SUM(Zero) twice → Rows.
- Apply Dual Axis.
- Make second pie white and smaller.
- Add SUM(Total) label in center.

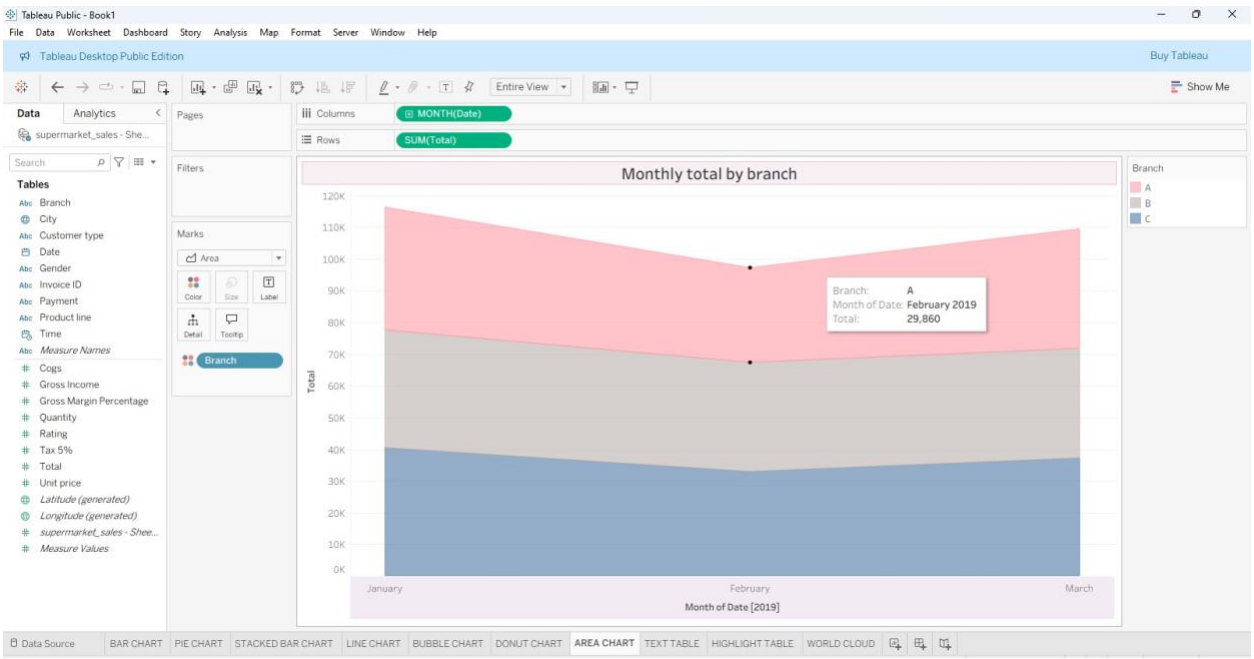


## Area Chart

**Purpose:** To show cumulative sales trend over time with filled area.

**Steps:**

- Drag Date (Month) → Columns.
- Drag Total → Rows.
- Change Marks type to Area.

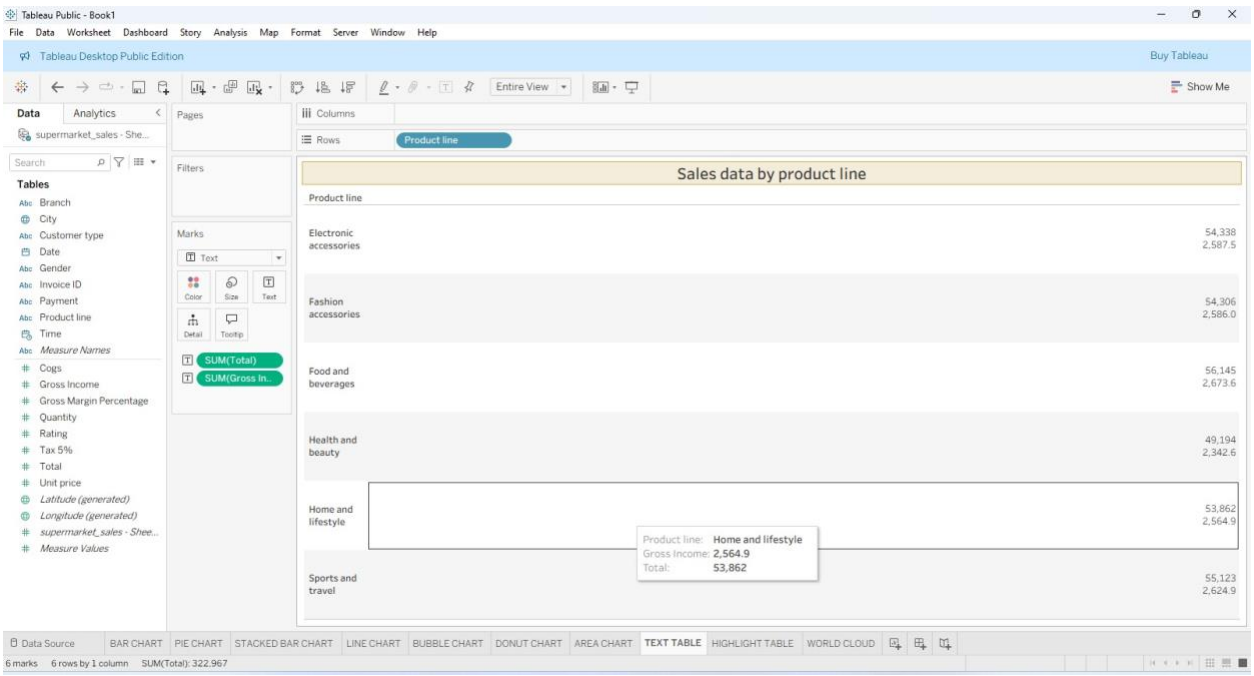


## Text Table

**Purpose:** To display exact numeric values in tabular format.

**Steps:**

- Drag Branch → Rows.
- Drag Product line → Columns.
- Drag Total → Text.

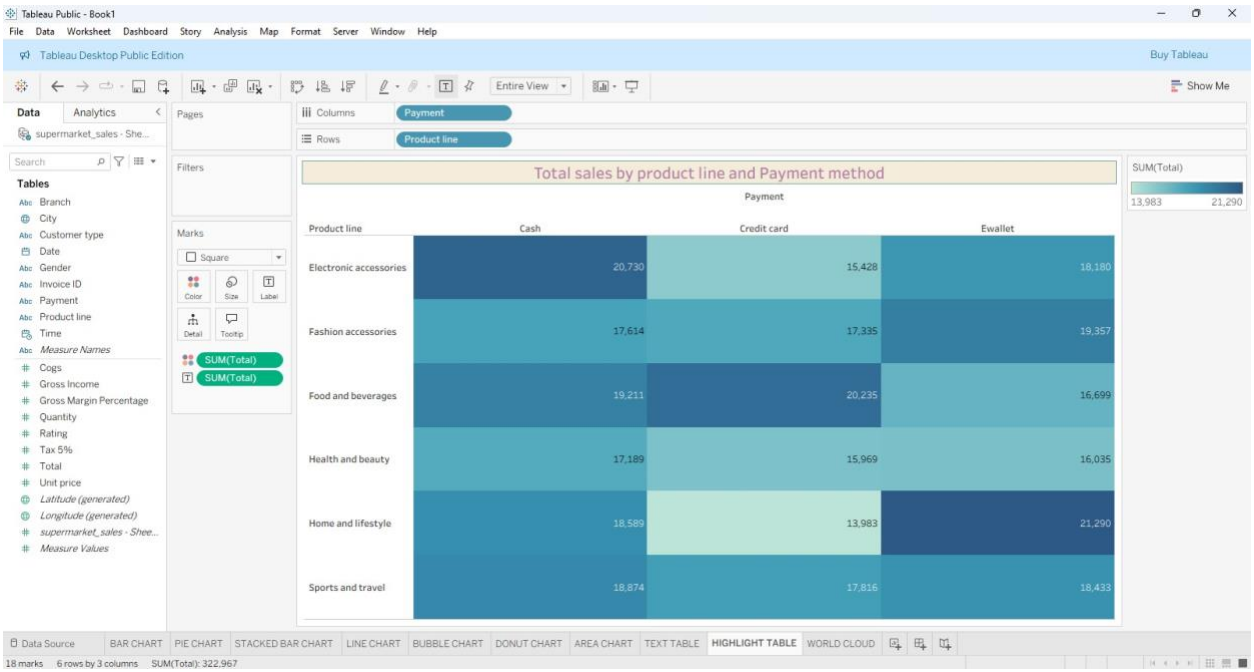


## Highlighted Table

**Purpose:** To compare sales intensity using color shading.

**Steps:**

- Create Text Table first.
- Click Show Me → Highlight Table.
- Drag Total → Color.

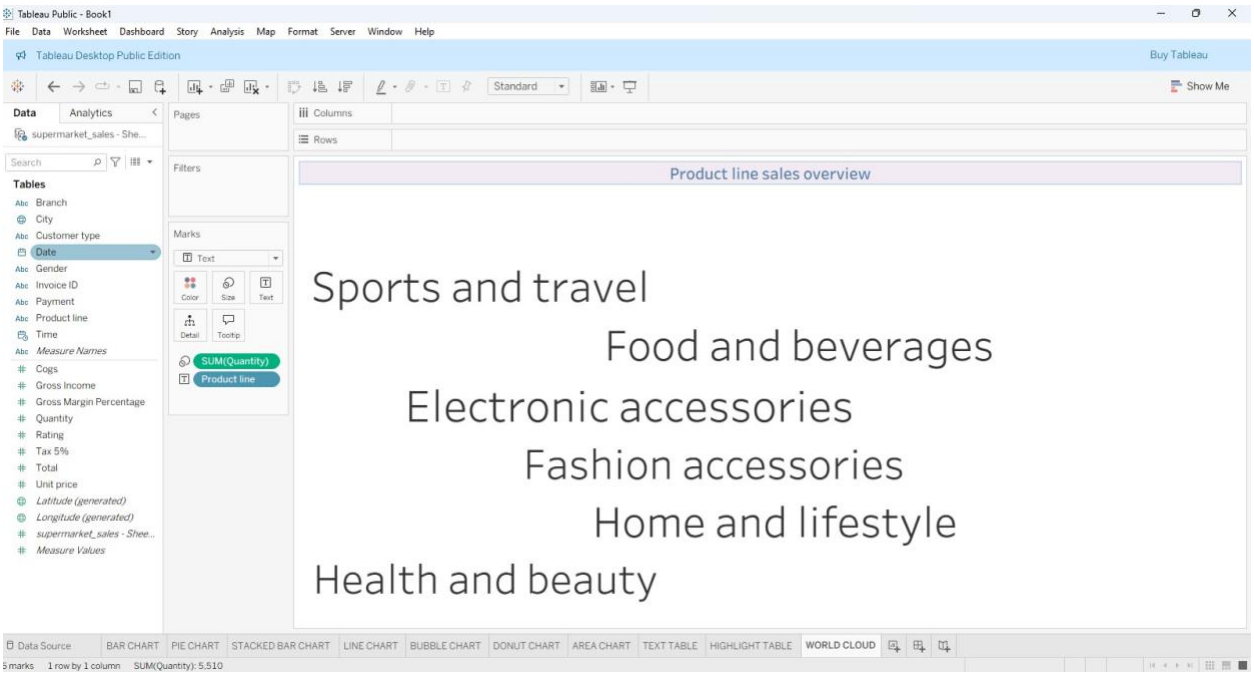


## Word Cloud

**Purpose:** To display product lines based on sales size.

**Steps:**

- Change Marks type to Text.
- Drag Product line → Text.
- Drag Total → Size.
- Adjust formatting.

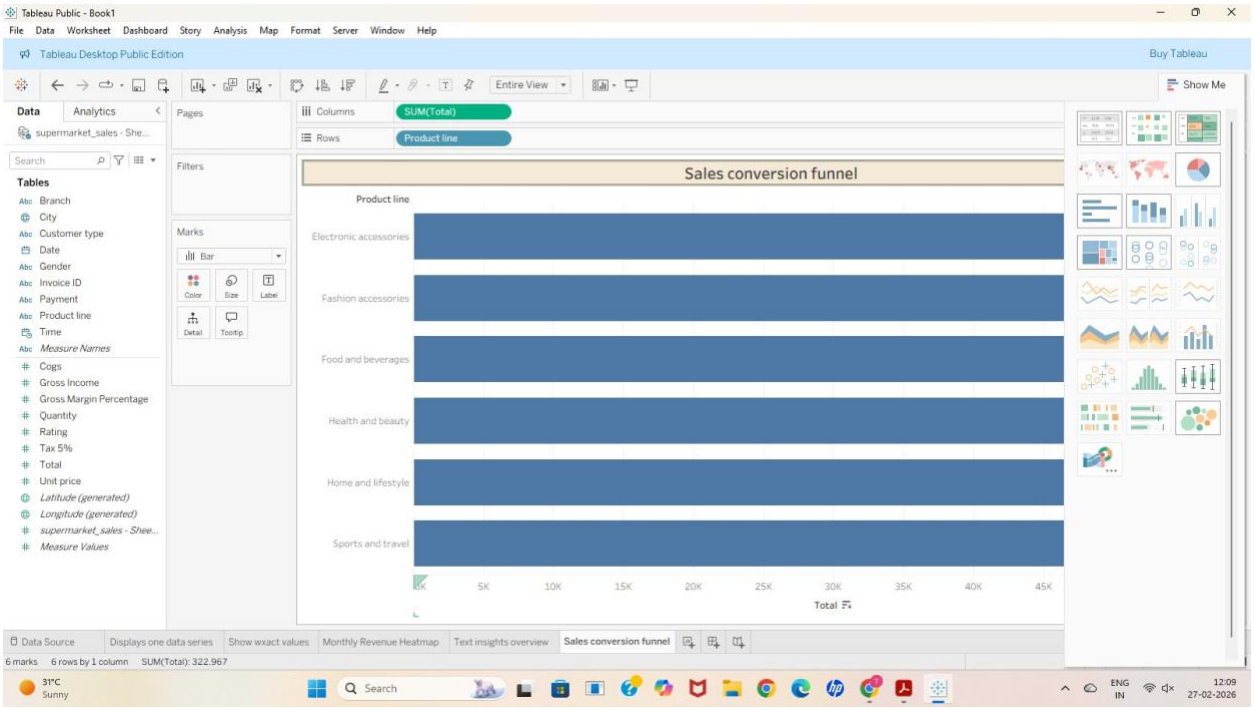


## Funnel Chart

**Purpose:** To show descending sales order of product lines.

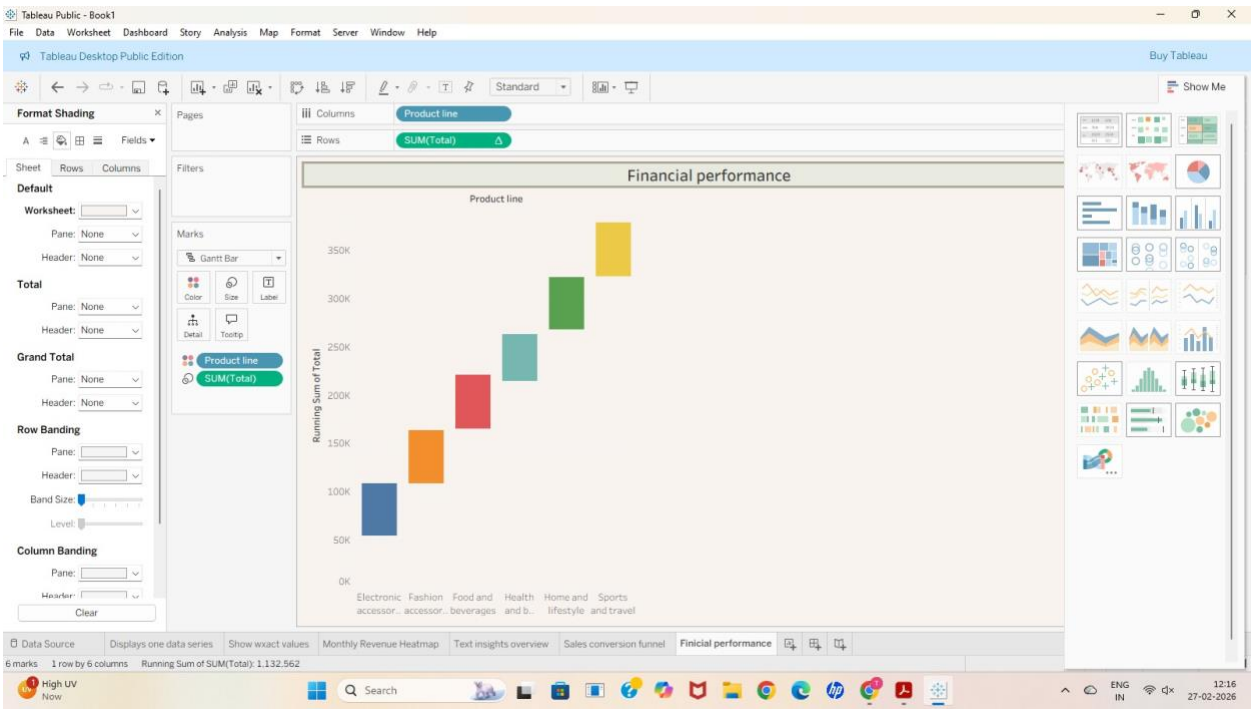
**Steps:**

- Drag Product line → Rows.
- Drag Total → Columns.
- Sort descending.
- Change Marks to Bar.
- Adjust size for funnel effect.



## Waterfall Chart

**Purpose:** To show cumulative contribution of each product line to total sales.

**Steps:**


- Drag Product line → Columns.
- Drag Total → Rows.
- Apply Quick Table Calculation → Running Total.
- Change Marks to Gantt Bar.
- Drag Total → Size.
