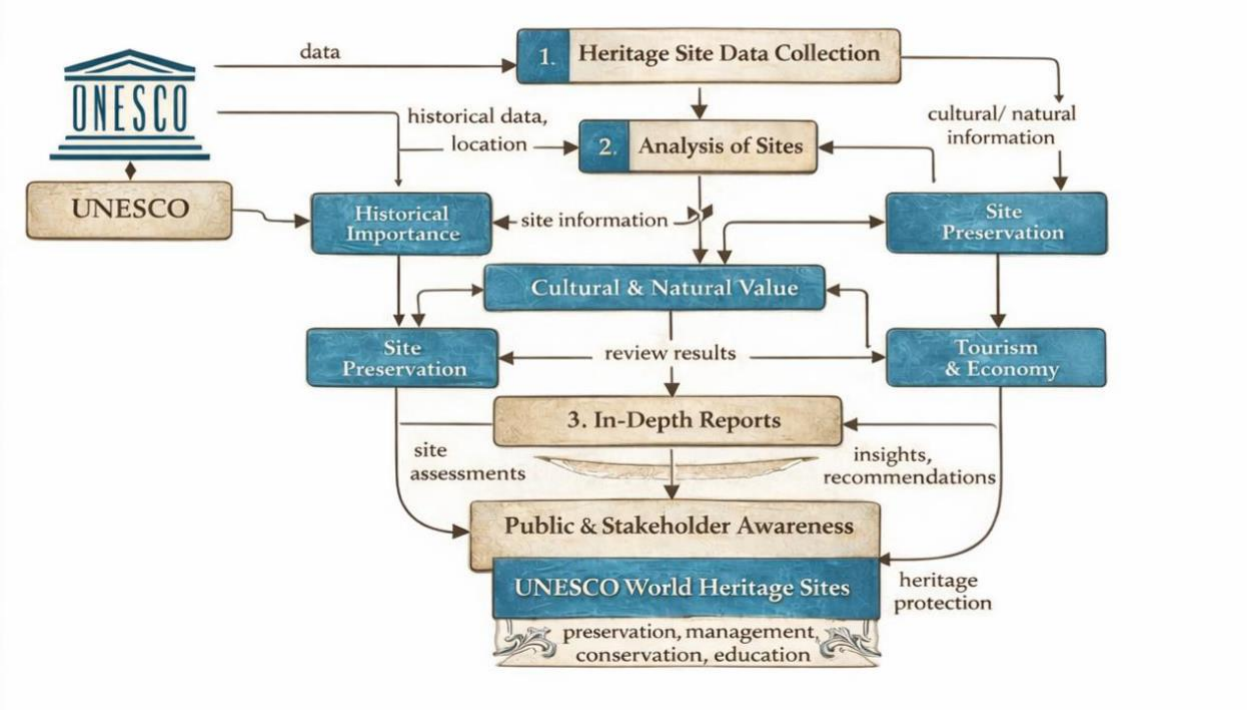
Project Design Phase – II

Data Flow Diagram & User Stories

Team Id	LTVIP2026TMIDS36716
Project Name	Heritage Treasures: An in-depth analysis of UNESCO world heritage sites using tableau

Data Flow Diagrams :

The data flow diagram for *Heritage* Treasure *illustrates* how heritage site data moves through the system. It begins with data collection from UNESCO sources, followed by data processing and cleaning. The processed data is then stored and visualized using Tableau to generate insights. Finally, the results are presented to stakeholders such as policymakers, researchers, and cultural enthusiasts to support informed decision-making and heritage preservation efforts.



User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Mobile User	Registration	User -1	As a visitor, I can register using email and password so that I can access the app features.	User can create account and access dashboard.	High	Sprint-1
Mobile User	Registration	User -2	As a visitor, I receive a confirmation email after registration.	Confirmation email Is sent and verified successfully.	High	Sprint -1
Mobile User	Login	User -3	As a visitor, I can register/login using Google.	User can login using Google and access dashboard.	Medium	Sprint-2
Mobile User	Login	User -4	As a visitor, I can login using email and password.	Valid credentials allow successful login.	High	Sprint-1
Mobile User	Explore Heritage Sites	User -5	As a visitor, I can browse heritage sites by category and location.	Sites are displayed with filters (location, type, era).	High	Sprint-1
Mobile User	Search	User-6	As a visitor, I can search for heritage sites by name or keyword.	Relevant search results are displayed.	High	Sprint-1
Mobile User	Site Details	User-7	As a visitor, I can view detailed	Details page shows images, description, timings, map location.	High	Sprint-1

			information about a heritage site.			
Mobile Use	Booking	User- 8	As a visitor, I can book tickets for a heritage site tour.	Booking confirmation is generated after payment.	High	Sprint-2
Mobile User	Payment	User- 9	As a visitor, I can pay securely using online payment methods.	Payment gateway processes transaction securely and shows receipt.	High	Sprint-2
Mobile User	Reviews	User-10	As a visitor, I can rate and review a heritage site.	Review is saved and visible to other users.	Medium	Sprint-3
Web User	Dashboard	User-11	As a web user, I can view my booking history and saved sites.	Dashboard displays booking history and favorites.	High	Sprint-2
Web User	Favorites	User -12	As a web user, I can save heritage sites to my favorites list.	Site is added to favorites and visible in profile.	Medium	Sprint-2
Content Manager	Site Management	User-13	As a content manager, I can add new heritage sites.	Admin panel allows adding site details successfully.	High	Sprint-1
Content Manager	Site Management	User-14	As a content manager, I can edit or delete heritage site information.	Changes reflect immediately on platform.	High	Sprint-1
Customer Support Executive	Booking Support	User-15	As a support executive, I can view and manage visitor bookings.	Support panel shows booking details and allows modification/cancellation.	Medium	Sprint-3

Administrator	User Management	User-16	As an admin, I can manage user accounts (activate/deactivate).	Admin can update user status successfully.	High	
Administrator	Reports & Analytics	User-17	As an admin, I can generate reports on bookings and revenue.	Reports can be viewed and exported (PDF/Excel).	Medium	Sprint-3
Administrator	Security	User-18	As an admin, I can manage roles and permissions.	Role-based access control is enforced correctly.	High	Sprint-2
